Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Employment and Payrolls Section,
Labour Division,

Statistics Canada, Ottawa, K1A 0V2 (telephone: 992-5613) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

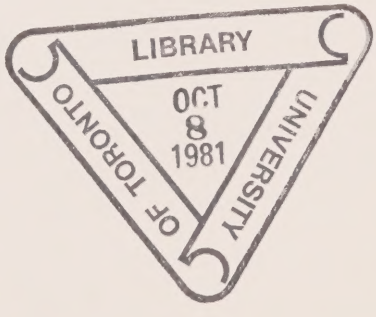

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des statistiques de l'emploi et de la rémunération,
Division du travail,

Statistique Canada, Ottawa, K1A 0V2 (téléphone: 992-5613) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indicatio contraire) les colonnes laissées en blanc dans le cas des employés et de ouvriers indiqués séparément, signifient que les données relatives au ouvriers pour lesquels les heures sont enregistrées ne sont pa disponibles.

COMMENTARY

First Estimates(1) – January 1979 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) index employment for January 1979 increased by 0.7% over December, 78. With the exception of construction which decreased, all industry isions recorded increases; all regions also participated in this rease.

Average weekly earnings, at the national industrial composite el, rose by 0.6%. The only industry divisions not contributing to this rease were construction, transportation, communication and other ities and service all of which showed decreases. Gains were orded in all regions except the Atlantic region, which declined.

Preliminary Data – December 1978

ployment

Seasonally adjusted, preliminary data for December increased by % at the Canadian industrial composite index of employment. restry, mining (including milling) and transportation, communica- n and other utilities were the only industry divisions which were owing decreases; all regions contributed to this increase.

rnings and Hours

Seasonally adjusted, average weekly earnings rose by 0.6% at the ional industrial composite level. Gains were recorded in most ustry divisions, the exceptions being forestry, mining (including ling) and trade; all regions recorded increases.

Unadjusted, average weekly earnings decreased by 1.5% to 9.32 at the Canadian industrial composite level. Average hourly nings increased by 12 cents in mining (including milling) to $9.26, one cent in manufacturing to $7.05 and decreased in construction 13 cents to $10.52. Average weekly hours decreased in mining cluding milling), manufacturing and construction.

See note on Statistical Presentation under Concepts and Methods at the back of this publication.

Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – janvier 1979 Chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries(2) du Canada révèlent une progression de 0.7% de décembre à janvier. Exception faite de la construction qui montre un recul, toutes les divisions de l'activité économique ont connu des hausses. On a observé des gains dans toutes les régions.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.6%. On a observé des gains dans la majeure partie des divisions de l'activité économique, exception faite de la construction, des transports, communications et autres services publics et des services qui ont diminué. Au niveau régional, seule la région de l'Atlantique a affiché une baisse.

Données provisoires – Décembre 1978

Emploi

Après désaisonnalisation, les données provisoires pour décembre 1978 montrent une hausse de 0.4% au niveau de l'ensemble des industries du Canada. Le forestage, les mines (y compris le broyage) et les transports, communications et autres services publics ont subi des pertes alors que les autres divisions ont affiché des hausses. Toutes les régions ont enregistré des gains.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 0.6% au niveau de l'ensemble des industries du Canada. Exception faite du forestage, des mines (y compris le broyage) et du commerce qui ont diminué, toutes les autres divisions de l'activité économique ont contribué à cette hausse. Toutes les régions ont participé à cette hausse générale.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une baisse de 1.5% pour atteindre $269.32 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de douze cents dans les mines (y compris le broyage) ($9.26), de un cent dans les manufactures ($7.05) et ont diminué de treize cents dans la construction ($10.52). Le nombre moyen d'heures hebdomadaires travaillées a baissé dans les mines (y compris le broyage), dans les manufactures et dans la construction.

---

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-region.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiee, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice etant plus près de la periode au cours de laquelle les rémunerations sont depensees. 2. Voir le detail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses elements dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

TORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

-1960

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ys, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. Employment, Earnings and Hours, *Cata--002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for s, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. *Catalogue 72-002, February 1968.*

verage Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

otia: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

verage Weekly Earnings, 1968-1970, for Canada, Ontario nto, for scientific and professional equipment; miscellaneous uring industries; non-durable goods; manufacturing; whole-; trade; industrial composite. *Catalogue 72-002, February*

verage Weekly Hours, Average Hourly Earnings, Average Vages of Hourly-rated Wage-earners 1961-1967 for:

Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^{O} *72-002 ... catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalogue, décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalogue, *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour 19... sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-1969.*

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-202* ... catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, transports, communication et autres services publics et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires– moyennes et rémunération horaire moyenne des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-002 ... catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'examplaire de septembre 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail pour les mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

es

The Monthly Employment, Payrolls and Manhours survey is d to measure the month-to-month trends of employment, paid nd earnings for the commercial sector of the economy with the n of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- d as weekly averages for earnings and hours paid for. The compiled and published at detailed industrial and geographic

of Data

he statistics contained in this report are based on information through a mail census of "larger firms".

he firm is defined as any business entity whether incorpo- not; it comprises sole proprietorships, partnerships, corpora- d other forms of organization such as co-operatives. Most nsist of only one "establishment" (see definition under l Classification) but in some cases the firm is made up of a of establishments which may or may not be engaged in the d of economic activity.

firm is considered as "larger" when it employs 20 or more n any one month of the year. Although the intent of the to cover all such firms, it also includes some firms with less employees and excludes some firms with more than 20 s; the reason is that, in practice, it is not always possible to promptly enough employment fluctuations in individual

he universe for the survey is derived from a central file of s maintained by the Business Register and Profiling Division cs Canada.

l commercial industries are covered by the survey, with the of agriculture, fishing and trapping; by definition such nercial sectors as education and related services, health and ervices, religious organizations, private households and ninistration and defense are excluded. Because the survey is "larger firms", the proportion of total employment covered vey varies among industries, provinces and urban areas. The table shows annual employment as reported in the survey ntage of the estimated total number of employees, the latter imated by adding together data from the Employment, nd Manhours survey and data from a sample survey of rms plus supplementary surveys. Estimates of the total f employees are published in "Estimates *of Employees by nd Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1977(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activité économique qui est déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. À des fins statistiques on définit l'établissement, qui consiste habituellement en une usine, une mine, un magasin ou une unité semblable, comme la plus petite unité constituant un ensemble d'exploitation distinct en mesure de déclarer tous les éléments de base de la statistique des activités économiques, qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi et la rémunération pour des endroits particuliers.

The industrial classification of the statistics contained in this s based on the Standard Industrial Classification for 1960. A tion of the various industries and groups of industries is ed in the "Standard Industrial Classification Manual", Cata- No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 ond to the codes of this manual. These tables also contain the ng groupings which are not part of the "Standard *Industrial cation Manual*".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

nic Classification

eporting units are assigned to a province, a county (as y the Census of Population) and, where applicable, to an ea. Data for Newfoundland, Prince Edward Island, Nova d New Brunswick are aggregated in some tables to give for the Atlantic Region. Similarly, data for Manitoba, wan and Alberta are added together to provide totals for the egion. The 1966 Census of Population's "Metropolitan finitions were used for the nineteen applicable urban areas; itions used for other urban areas are based on a labour ncept. The urban areas usually consist of the urban centre as e surrounding territory. A list showing the territory included bulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procure liste indiquant le territoire compris dans chaque région urbaine figu dans les tableaux en vous adressant à la Section des statistiques de l'en et de la rémunération. Les chiffres des unités déclarantes situées ailleur dans une région urbaine indiquée dans les tableaux ou non attribuées comté dont le nom figure sur la liste font partie des totaux provinc régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept de jours du mois de référence. En pratique, étant donné qu d'entreprises tiennent des registres de paye pour cette période pr on leur permet de faire porter leur déclaration sur la (les) dernie période(s) de paye de chaque mois. Lorsque la période de pa laquelle porte la déclaration dépasse une semaine, on rajus données en effectuant le calcul suivant: on divise le nombre de d'activité hebdomadaire de l'entreprise par le nombre de ouvrables compris dans la période de paye sur laquelle po déclaration. Si, en raison d'une grève, d'un jour férié ou d' facteurs semblables, les données déclarées ne sont pas représent de la période de référence, on procède aux rajustements qui s' sent afin de traduire fidèlement la situation pendant les sept de jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses ab pendant la semaine de référence et pour laquelle l'employeur ve contributions au R.P.C. ou au R.R.Q. et à la caisse d'assu chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps ple salariés à temps partiel (ceux qui travaillent régulièrement un n d'heures inférieur à la semaine normale de travail de l'entrep les salariés occasionnels (ceux qui sont embauchés de façon ten re ou irrégulière et qui ont travaillé au moins sept heures au c la période de référence).

Le concept des salariés exclut les propriétaires et les part d'entreprises non constituées en corporation et ceux qui possè bureau pour l'exercice d'une profession, les travailleurs autono travailleurs familiaux non rémunérés, les bénévoles, les retrai travailleurs à domicile, les membres de corps élus ou nom personnel militaire et les personnes fournissant des servic établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une parti période de référence mais qui étaient en chômage ou en grève p le reste de la période. Les personnes n'ayant pas touché de pa la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant e ment à la production et à des opérations assimil particulier le personnel d'entretien, d'entrepôt et de li le personnel de sécurité, les chauffeurs-livreurs, les v itinérants, les commis des magasins de détail, les serv les contremaîtres remplissant des fonctions analogues des ouvriers dont ils ont la charge, etc. Toutes ces p sont considérées comme des ouvriers, que leurs gair fondés sur des taux de rémunération mensuels, hor autres. Les salaires hebdomadaires moyens sont calcu tous les ouvriers, mais les heures hebdomadaires moy les gains horaires moyens sont calculés uniquement p dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of data, the response rate is increased through two reminders mailed to non-respondents one month and two months after the original mailout. If the two reminders do not produce a response, the Field Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are taken into account for in the employment, earnings and hours tables of the publication. To do this, the unknown figures are replaced by estimates based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclaran fournies le mois précédent et de celles fournies par les unités déclarantes ressemblent à l'entreprise non répondante sur le plan du classement activité économique, la taille et le lieu géographique, et qui ont répo pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada soigneusement vérifiés à la main et par ordinateur pour assurer q sont complets, cohérents et exacts. Pour être vérifiées par ordina les réponses sont réparties en groupes d'imputation constitué fonction du classement par activité économique, du lieu géograph et de la taille de l'unité déclarante. La composition de ces groupe telle qu'ils regroupent des unités déclarantes qui présentent les mê caractéristiques et dont les caractéristiques affichent les mêmes entre elles. Cette vérification permet de comparer la valeur d caractéristique (nombre de salariés, heures de travail, gains salarié, rapport du nombre actuel de salariés à celui du mois p dent, etc.) par rapport à la valeur de la caractéristique correspond pour tout le groupe d'imputation. L'écart qui peut séparer la v d'une caractéristique et la valeur moyenne de la même caractéris pour le groupe d'imputation tout entier est calculé séparément chaque groupe et pour chaque caractéristique, et dépend de l'hon néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour to groupe d'imputation, on le remplace par une valeur qui compo variance maximum permise par la vérification par ordinateur. Il pas toujours possible de trouver une valeur qui se situe à l'intérie la limite permise par l'ordinateur; si tel est le cas, on rempla chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde p modification indue d'un chiffre qui était exact au départ. Cela n'e trop grave si l'on considère que ce procédé mécanique perm déceler efficacement un grand nombre d'erreurs graves comm points décimaux mal placés, des erreurs d'inscription des donn des problèmes attribuables à une mauvaise interprétation des d tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de cer unités déclarantes, alors que d'autres renvoient des questionnair sont rejetés à la vérification et qui ne peuvent être corrigés machine. Une partie ou la totalité des données pour ces unités d doivent donc être imputées. Cela signifie que les caractéristiques incorrec inconnues sont remplacées par des valeurs calculées en fo d'autres caractéristiques de la même déclaration de l'entreprise déclaration du mois précédent et des caractéristiques du g d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations c mois. Comme dans le cas de la correction automatique des err est possible qu'une valeur exacte au départ soit remplacée p autre. Toutefois, il arrive plus souvent qu'un chiffre erroné c existant soit remplacé par un chiffre plus proche de la valeur ré fondé sur la déclaration de l'entreprise du mois précédent et su d'entreprises qui font partie d'une branche d'activité sem appartiennent au même groupe de taille et sont situées dans le lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-homme une enquête exhaustive, toute inexactitude dans les résultats est attri à une erreur d'observation. Parmi les exemples de sources d' d'observation, citons l'impossibilité d'obtenir des renseignements de les unités de l'échantillon, les renseignements inexacts fournis

g and processing of the data. Non-sampling errors are difficult asure and no estimates of this type of error have been obtained is survey as yet. However, non-sampling errors have been kept inimum by the use of a carefully designed and carefully worded onnaire, the relative simplicity of the data requested, follow-up n-respondents, thorough editing of data and control of the sing operations.

tical Presentation

Data Revision

ach month, statistics for three latest months are prepared by the mployment and Payrolls Section. Data for the first, most urrent month, are entitled first estimates. They are based on a mited number of returns (usally about 55%) and only highly ggregated figures are released in the Statistics Canada *Daily* and he First Estimates table of this publication. Simultaneously, econd estimates are prepared for the month immediately pre-eding the most current data and third estimates for the month rior to that. Both of these latter estimates are of course, of igher quality than that of the first estimates because of the igher rate of returns (approximately 75% and 82% respectively). onsequently, full details for both of these months are shown in is publication.

fter completion of the third estimate, revisions to the data are ade occasionally to incorporate larger corrections originating om late returns and corrected information received from spondents or to rectify mechanical errors. These corrections ppear in the tables of this publication.

dex Numbers

dex numbers are calculated by dividing the current month's mployment (or payroll) by the monthly - average of the total se year employment (or payroll).

he index numbers constitute a better measure of the monthly ends in statistical series than the actual values because they are t effected by certain statistical changes. For example, a large m erroneously missing from the survey can be introduced by justing both the current and base year data and, thus, will not stort the monthly changes indicated by the index numbers. owever, the measure of the monthly trend calculated from the ual value will be biased because the additions which should be lected in all months are only included from the time the rrection is made.

erages

e average weekly hours figure is obtained by dividing total ekly man-hours by the number of wage-earners who worked se hours. Average hourly earnings are obtained by dividing al weekly wages of hourly-rated wage-earners by their total ekly hours. Both of these averages apply only to the subset of ge-earners for whom hourly details are reported. It should be ed that total hours include overtime hours actually worked that the wage-earners total includes part-time wage-earners casuals working more than seven hours during the survey rence week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. **Révision des données**

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifie à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. **Nombres-indices**

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. **Moyennes**

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 — December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont caus par des mouvements saisonniers, cycliques et irréguliers. Une sé désaisonnalisée est une série dont on a éliminé les effets des mou ments saisonniers. Les mouvements saisonniers sont ceux qui s causés par des événements annuels réguliers comme les changeme de température, les cycles agricoles, les jours fériés et les vacance convient de noter que la série désaisonnalisée contient des fluctuati irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bur of the Census* est utilisée pour désaisonnaliser. Ce système permet déceler les mouvements saisonniers, tendanciels et irréguliers au co d'une période de plusieurs années et, à la lumière des mouveme passés, d'estimer les coefficients saisonniers appropriés pour l'an en cours. Sur une base annuelle, toute la série chronologique données désaisonnalisées est révisée à la lumière des renseignem les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisor lisés de l'emploi, ainsi que les heures hebdomadaires moyennes e gains horaires moyens pour certaines séries statistiques. Vous tro rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémun tion et heures, séries désaisonnalisées, janvier 1961 — décembre 1* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer qu confidentialité des réponses des entreprises soit respectée.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indi contraire) les colonnes laissées en blanc dans le cas des employés ouvriers indiqués séparément, signifient que les données relativ ouvriers pour lesquels les heures sont enregistrées ne son disponibles.

COMMENTARY

First Estimates(1) – February 1979 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) of employment for February increased by 0.3% over January Forestry, mining (including milling) and construction were the ndustry divisions not participating in the increase. All regions ered gains except the Atlantic region which showed no e.

Average weekly earnings, at the national industrial composite showed virtually no change (+ 0.2%). Mining (including g), manufacturing, transportation, communication and other s, and service increased while the remaining industry divisions ed. In the regions, the Atlantic region, Ontario and British bia rose while the others declined.

Preliminary Data – January 1979

yment

Seasonally adjusted, preliminary data for January increased by at the Canadian industrial composite index of employment. ry, construction, transportation, communication and other s registered decreases while the remaining industry divisions ed. All regions registered gains.

gs and Hours

Seasonally adjusted, average weekly earnings rose by 1.0% at tional industrial composite level. Gains were recorded in all y divisions except construction which declined and transporta- mmunication and other utilities which remained unchanged; ons recorded increases.

Unadjusted, average weekly earnings rose by 2.9% to $276.87 Canadian industrial composite level. Average hourly earnings ed by 7 cents in mining (including milling) to $9.30, by 11 n manufacturing to $7.15 and by 30 cents in construction to Average weekly hours increased in mining (including mill- anufacturing and construction.

note on Statistical Presentation under Concepts and Methods the back of this publication.
dustrial Composite is the sum for all industries with the ception of agriculture, fishing and trapping, education and ated services, health and welfare services, religious organi- ions, private households and public administration and de- ce. All statistics are based on returns received from employers ving twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – février 1979 (chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries(2) du Canada révèlent une progression de 0.3% de janvier à février. Le forestage, les mines (y compris le broyage) et la construction furent les seules divisions de l'activité économique à ne pas participer à cette hausse; on a observé des gains dans toutes les régions sauf dans la région de l'Atlantique qui n'a pas varié.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada sont demeurés pratiquement inchangés (+ 0.2%). On a observé des gains dans les mines (y compris le broyage), les manufactures, les transports, communications et autres services publics, et les services alors que les autres divisions de l'activité économique régressaient. La région de l'Atlantique, l'Ontario et la Colombie-Britannique ont enregistré des hausses mais les autres régions ont connu des pertes.

Données provisoires – janvier 1979

Emploi

Après désaisonnalisation, les données provisoires pour janvier 1979 montrent une hausse de 0.5% au niveau de l'ensemble des industries du Canada. Le forestage, la construction et les transports, communications et autres services publics ont subi des pertes alors que les autres divisions de l'activité économique ont affiché des hausses. Toutes les régions ont participé à la hausse.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 1% au niveau de l'ensemble des industries du Canada. Des hausses furent enregistrées dans toutes les divisions de l'activité économique à l'exception de la construction qui a connu des pertes et des transports, communications et autres services publics qui n'ont pas varié. Toutes les régions ont enregistré des hausses.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 2.9% pour atteindre $276.87 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de 7 cents dans les mines (y compris le broyage) ($9.30), de 11 cents dans les manufactures ($7.15) et de 30 cents dans la construction ($10.80). Le nombre moyen d'heures hebdomadaires travaillées s'est élevé dans les mines (y compris le broyage), dans les manufactures et dans la construction.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

STORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

57-1960

Monthly data were not published but are available on st.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

61-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ays, bridges and streets; engineering; construction; highway idge maintenance; transportation; and transportation, commu-n and other utilities. Employment, Earnings and Hours, *Cata-72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for ays, bridges and streets; engineering; construction; highway idge maintenance; transportation; and transportation, commu-n and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

a: Transportation; Highway and bridge maintenance.

c Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario oronto, for scientific and professional equipment; miscellaneous ucturing industries; non-durable goods; manufacturing; whole-t de; trade; industrial composite. *Catalogue 72-002, February*

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners 1961-1967 for:

: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^{O} 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n^{O} 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^{O} *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^{O} *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^{O} 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^{O} *72-002 au catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalogue décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalogue *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-1969.*

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, transports, communication et autres services publics et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires– moyennes et rémunération horaire moyenne des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-002 au catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'examplaire de septembre 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail pour les mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

tives

The Monthly Employment, Payrolls and Manhours survey is ned to measure the month-to-month trends of employment, paid and earnings for the commercial sector of the economy with the ion of agriculture, fishing and trapping.

These measures are expressed in an index form for employand as weekly averages for earnings and hours paid for. The re compiled and published at detailed industrial and geographic

e of Data

The statistics contained in this report are based on information ed through a mail census of "larger firms".

The firm is defined as any business entity whether incorpor not; it comprises sole proprietorships, partnerships, corporand other forms of organization such as co-operatives. Most consist of only one "establishment" (see definition under rial Classification) but in some cases the firm is made up of a r of establishments which may or may not be engaged in the ind of economic activity.

A firm is considered as "larger" when it employs 20 or more in any one month of the year. Although the intent of the is to cover all such firms, it also includes some firms with less 0 employees and excludes some firms with more than 20 ees; the reason is that, in practice, it is not always possible to promptly enough employment fluctuations in individual

e

The universe for the survey is derived from a central file of rs maintained by the Business Register and Profiling Division tics Canada.

e

All commercial industries are covered by the survey, with the n of agricultural, fishing and trapping; by definition such mercial sectors as education and related services, health and services, religious organizations, private households and dministration and defense are excluded. Because the survey is o "larger firms", the proportion of total employment covered rvey varies among industries, provinces and urban areas. The g table shows annual employment as reported in the survey entage of the estimated total number of employees, the latter timated by adding together data from the Employment, and Manhours survey and data from a sample survey of firms plus supplementary surveys. Estimates of the total of employees are published in "Estimates *of Employees by and Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1977(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a samp survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête s l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêt supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréati commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private household are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compr l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimati de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciau l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus da l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'act économique qui est déterminée en fonction de leur activité principal l'entreprise n'exerce qu'un seul genre d'activité économique, le classer est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, exemple lorsqu'elle possède plus d'un établissement. À des fins statistic on définit l'établissement, qui consiste habituellement en une usine, mine, un magasin ou une unité semblable, comme la plus petite constituant un ensemble d'exploitation distinct en mesure de déclarer les éléments de base de la statistique des activités économiques, permettent de calculer la "valeur ajoutée" ou la "majoration brute" "bénéfice brut", ainsi que des données sur l'emploi et la rémunératio

Pour permettre d'obtenir des statistiques géographiques détai l'établissement est souvent subdivisé en unités déclarantes qui, qu'elles ne puissent fournir toutes les statistiques de base, sont en m de déclarer des données sur l'emploi et la rémunération pour des enc particuliers.

The industrial classification of the statistics contained in this ort is based on the Standard Industrial Classification for 1960. A cription of the various industries and groups of industries is tained in the "Standard Industrial Classification Manual", Cata- ue No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 espond to the codes of this manual. These tables also contain the owing groupings which are not part of the "Standard *Industrial ssification Manual*".

a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

raphic Classification

Reporting units are assigned to a province, a county (as :d by the Census of Population) and, where applicable, to an area. Data for Newfoundland, Prince Edward Island, Nova and New Brunswick are aggregated in some tables to give ics for the Atlantic Region. Similarly, data for Manitoba, tchewan and Alberta are added together to provide totals for the e Region. The 1966 Census of Population's "Metropolitan definitions were used for the nineteen applicable urban areas; efinitions used for other urban areas are based on a labour t concept. The urban areas usually consist of the urban centre as s the surrounding territory. A list showing the territory included h tabulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer u liste indiquant le territoire compris dans chaque région urbaine figur dans les tableaux en vous adressant à la Section des statistiques de l'emp et de la rémunération. Les chiffres des unités déclarantes situées ailleurs dans une région urbaine indiquée dans les tableaux ou non attribuées à comté dont le nom figure sur la liste font partie des totaux provincia régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept dern jours du mois de référence. En pratique, étant donné que d'entreprises tiennent des registres de paye pour cette période pré on leur permet de faire porter leur déclaration sur la (les) dernièr période(s) de paye de chaque mois. Lorsque la période de paye laquelle porte la déclaration dépasse une semaine, on rajuste données en effectuant le calcul suivant: on divise le nombre de j d'activité hebdomadaire de l'entreprise par le nombre de j ouvrables compris dans la période de paye sur laquelle port déclaration. Si, en raison d'une grève, d'un jour férié ou d'au facteurs semblables, les données déclarées ne sont pas représentat de la période de référence, on procède aux rajustements qui s'im sent afin de traduire fidèlement la situation pendant les sept dern jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses abse pendant la semaine de référence et pour laquelle l'employeur vers contributions au R.P.C. ou au R.R.Q. et à la caisse d'assura chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein salariés à temps partiel (ceux qui travaillent régulièrement un nor d'heures inférieur à la semaine normale de travail de l'entrepris les salariés occasionnels (ceux qui sont embauchés de façon temp re ou irrégulière et qui ont travaillé au moins sept heures au cou la période de référence).

Le concept des salariés exclut les propriétaires et les parten d'entreprises non constituées en corporation et ceux qui possèdei bureau pour l'exercice d'une profession, les travailleurs autonome travailleurs familiaux non rémunérés, les bénévoles, les retraité travailleurs à domicile, les membres de corps élus ou nomm personnel militaire et les personnes fournissant des services établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une partie période de référence mais qui étaient en chômage ou en grève per le reste de la période. Les personnes n'ayant pas touché de paye la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, so employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant effe ment à la production et à des opérations assimilée particulier le personnel d'entretien, d'entrepôt et de livr le personnel de sécurité, les chauffeurs-livreurs, les ven itinérants, les commis des magasins de détail, les serveu les contremaîtres remplissant des fonctions analogues à des ouvriers dont ils ont la charge, etc. Toutes ces pers sont considérées comme des ouvriers, que leurs gains fondés sur des taux de rémunération mensuels, horai autres. Les salaires hebdomadaires moyens sont calculé tous les ouvriers, mais les heures hebdomadaires moyen les gains horaires moyens sont calculés uniquement pou dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of the response rate is increased through two reminders mailed to non-respondents one month and two months after the original mailout. If the two reminders do not produce a response, the Field Operations of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of the publication. To do this, the unknown figures are replaced by figures based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclara fournies le mois précédent et de celles fournies par les unités déclarante ressemblent à l'entreprise non répondante sur le plan du classemen activité économique, la taille et le lieu géographique, et qui ont rép pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada soigneusement vérifiés à la main et par ordinateur pour assurer sont complets, cohérents et exacts. Pour être vérifiées par ordin les réponses sont réparties en groupes d'imputation constitu fonction du classement par activité économique, du lieu géograp et de la taille de l'unité déclarante. La composition de ces group telle qu'ils regroupent des unités déclarantes qui présentent les m caractéristiques et dont les caractéristiques affichent les mêmes entre elles. Cette vérification permet de comparer la valeur caractéristique (nombre de salariés, heures de travail, gain salarié, rapport du nombre actuel de salariés à celui du mois dent, etc.) par rapport à la valeur de la caractéristique correspon pour tout le groupe d'imputation. L'écart qui peut séparer la d'une caractéristique et la valeur moyenne de la même caractéri pour le groupe d'imputation tout entier est calculé séparément chaque groupe et pour chaque caractéristique, et dépend de l'ho néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour t groupe d'imputation, on le remplace par une valeur qui comp variance maximum permise par la vérification par ordinateur. I pas toujours possible de trouver une valeur qui se situe à l'intéri la limite permise par l'ordinateur; si tel est le cas, on rempl chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde modification indue d'un chiffre qui était exact au départ. Cela n' trop grave si l'on considère que ce procédé mécanique perm déceler efficacement un grand nombre d'erreurs graves comm points décimaux mal placés, des erreurs d'inscription des don des problèmes attribuables à une mauvaise interprétation des tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de ce unités déclarantes, alors que d'autres renvoient des questionnai sont rejetés à la vérification et qui ne peuvent être corrigé machine. Une partie ou la totalité des données pour ces unités d donc être imputées. Cela signifie que les caractéristiques incorre inconnues sont remplacées par des valeurs calculées en fo d'autres caractéristiques de la même déclaration de l'entrepris déclaration du mois précédent et des caractéristiques du d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations mois. Comme dans le cas de la correction automatique des er est possible qu'une valeur exacte au départ soit remplacée p autre. Toutefois, il arrive plus souvent qu'un chiffre erroné existant soit remplacé par un chiffre plus proche de la valeur r fondé sur la déclaration de l'entreprise du mois précédent et su d'entreprises qui font partie d'une branche d'activité sem appartiennent au même groupe de taille et sont situées dans l lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-homm une enquête exhaustive, toute inexactitude dans les résultats est attr à une erreur d'observation. Parmi les exemples de sources d d'observation, citons l'impossibilité d'obtenir des renseignements d les unités de l'échantillon, les renseignements inexacts fournis

ing and processing of the data. Non-sampling errors are difficult measure and no estimates of this type of error have been obtained this survey as yet. However, non-sampling errors have been kept minimum by the use of a carefully designed and carefully worded stionnaire, the relative simplicity of the data requested, follow-up non-respondents, thorough editing of data and control of the cessing operations.

tistical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain statistical changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. **Révision des données**

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. **Nombres-indices**

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. **Moyennes**

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 — December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causé par des mouvements saisonniers, cycliques et irréguliers. Une sér désaisonnalisée est une série dont on a éliminé les effets des mouv ments saisonniers. Les mouvements saisonniers sont ceux qui so causés par des événements annuels réguliers comme les changemer de température, les cycles agricoles, les jours fériés et les vacances. convient de noter que la série désaisonnalisée contient des fluctuatio irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bure of the Census* est utilisée pour désaisonnaliser. Ce système permet déceler les mouvements saisonniers, tendanciels et irréguliers au cou d'une période de plusieurs années et, à la lumière des mouvemer passés, d'estimer les coefficients saisonniers appropriés pour l'ann en cours. Sur une base annuelle, toute la série chronologique d données désaisonnalisées est révisée à la lumière des renseignemer les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonn lisés de l'emploi, ainsi que les heures hebdomadaires moyennes et gains horaires moyens pour certaines séries statistiques. Vous trou rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémuné tion et heures, séries désaisonnalisées, janvier 1961 — décembre 19* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que confidentialité des réponses des entreprises soit respectée.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indic contraire) les colonnes laissées en blanc dans le cas des employés e ouvriers indiqués séparément, signifient que les données relatives ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First Estimates(1) – March 1979
(Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) ndex of employment for March remained unchanged from February 979. Mining (including milling), construction, transportation, com- nunication and other utilities and service increased while the remain- ng industry divisions decreased. All regions advanced with the xception of the Atlantic region and Quebec which declined.

Average weekly earnings, at the national industrial composite vel, increased by 1.0%. Gains were recorded in all industry divisions ith the exception of transportation, communication and other ilities which showed virtually no change. All regions contributed to e increase.

Preliminary Data – February 1979

nployment

Seasonally adjusted, preliminary data for February increased 0.3% at the Canadian industrial composite index of employment. restry, construction, transportation, communication and other lities registered decreases while the remaining industry division reased. All regions registered gains with the exception of the Prairie gion which declined.

rnings and Hours

Seasonally adjusted, average weekly earnings rose by 0.3% at national industrial composite level. Forestry, finance, insurance l real estate registered decreases while the remianing industry isions increased. All regions recorded increases with the exception he Prairie region which decreased.

Unadjusted, average weekly earnings rose by 0.6% to $277.81 he Canadian industrial composite level. Average hourly earnings eased by 11 cents in mining (including milling) to $9.41, by 3 s in manufacturing to $7.18 and by 9 cents in construction to .87. Average weekly hours decreased in mining (including mill- , increased in construction and remained unchanged in ufacturing.

(1) See note on Statistical Presentation under Concepts and Methods e back of this publication.
(2) Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organi- zations, private households and public administration and de- fence. All statistics are based on returns received from employers having twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – mars 1979
(chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des indus- tries(2) du Canada sont demeurées inchangées de février à mars 1979. Les mines (y compris le broyage), la construction, les transports, communica- tions et autres services publics et les services ont participé à cette hausse alors que les autres divisions de l'activité économique ont subi des pertes. Toutes les régions ont enregistré des gains à l'exception de la région de l'Atlantique et du Québec qui ont affiché des baisses.

Les gains hebdomadaires moyens ont enregistré une hausse de 1.0% au niveau de l'ensemble des industries du Canada. On a observé des gains dans toutes les divisions de l'activité économique à l'exception des transports, communications et autres services publics qui n'ont pas varié. Toutes les régions ont participé à cette hausse.

Données provisoires – février 1979

Emploi

Après désaisonnalisation, les données provisoires pour février 1979 montrent une hausse de 0.3% au niveau de l'ensemble des industries du Canada. Le forestage, la construction et les transports, communications et autres services publics ont subi des pertes alors que les autres divisions de l'activité économique ont affiché des hausses. Toutes les régions ont participé à cette hausse à l'exception de la région des Prairies qui a affiché une baisse.

Gains et heures de travail

Les gains hebdomadaires moyens désaisonnalisés se sont accrus de 0.3% au niveau de l'ensemble des industries du Canada. Des hausses furent enregistrées dans toutes les divisions de l'activité économique à l'exception du forestage et des finances, assurances et immeuble qui ont connu des pertes. Toutes les régions ont enregistré des hausses à l'exception des Prairies qui ont affiché des baisses.

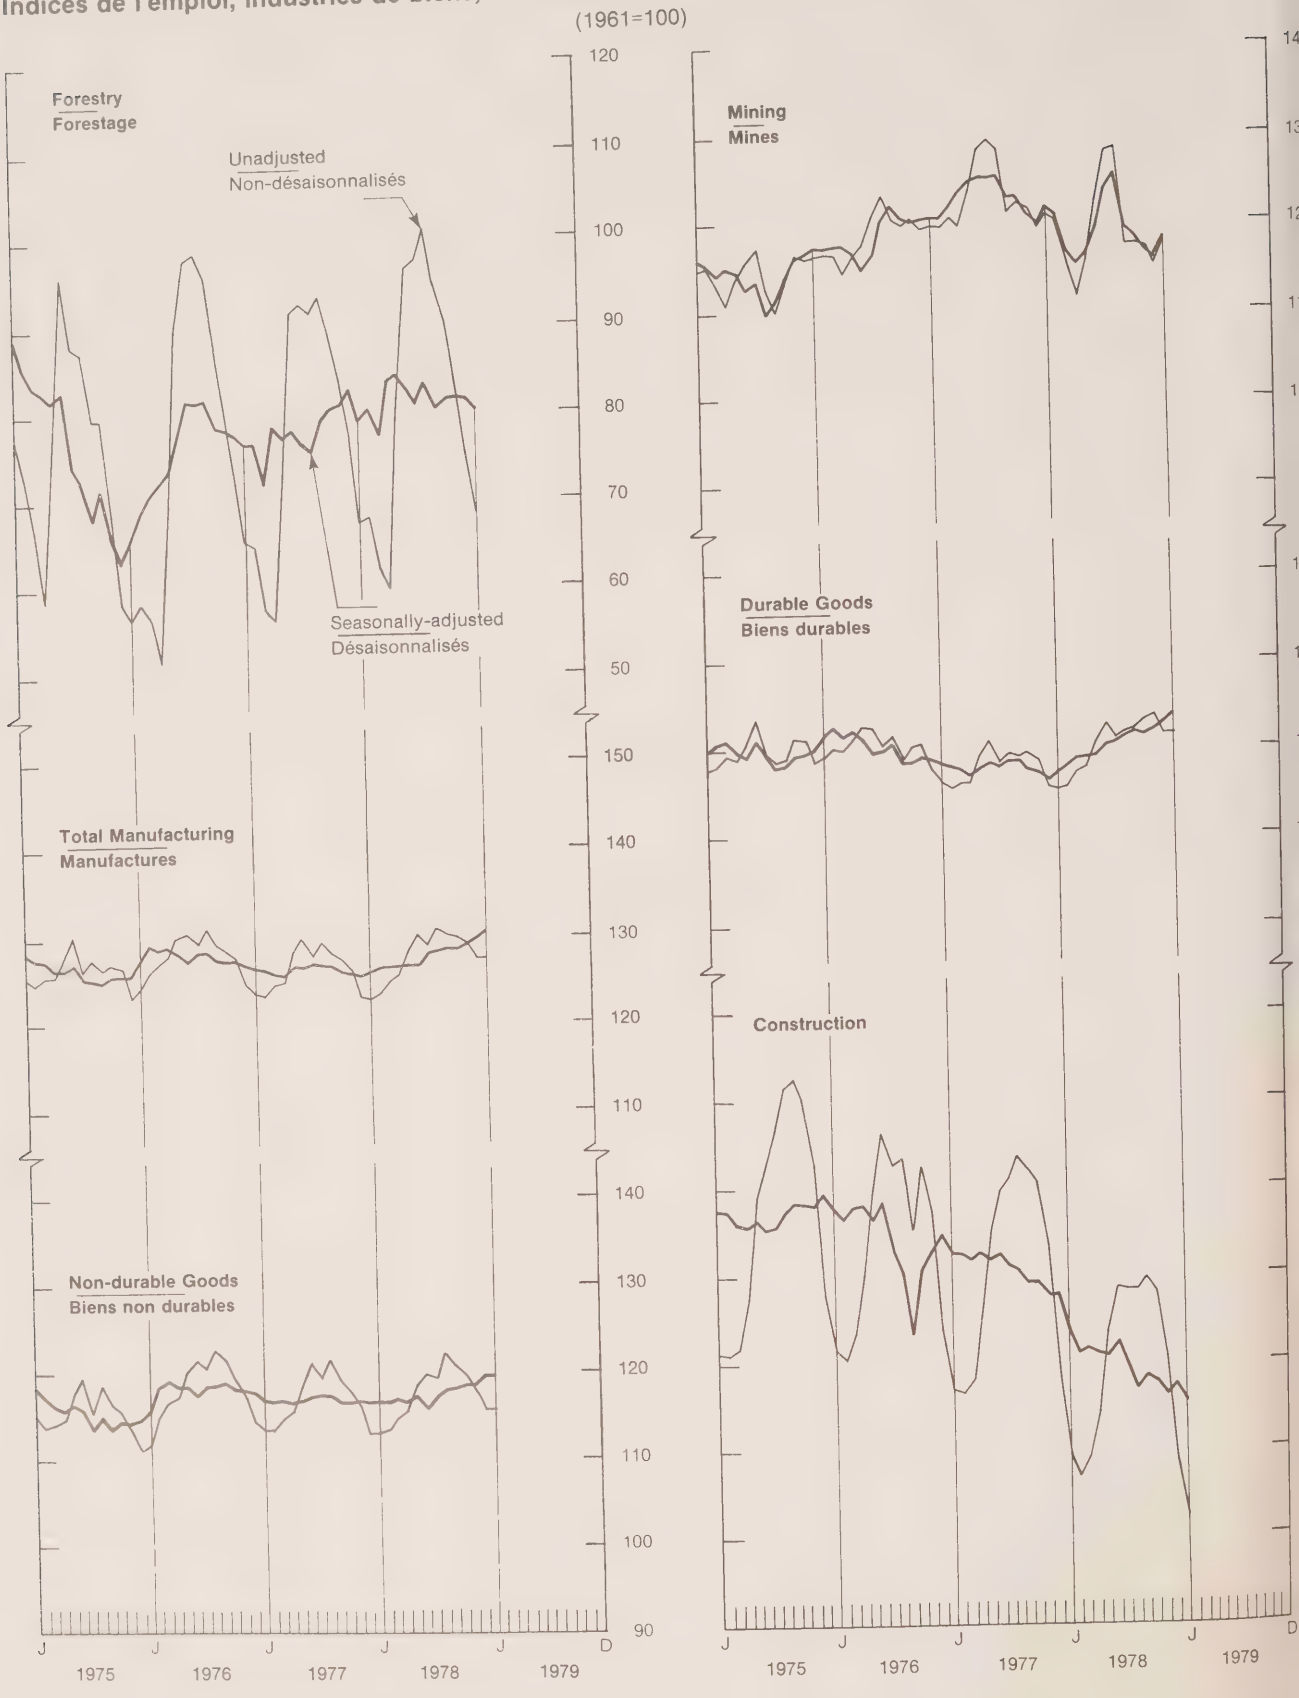

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 0.6% pour atteindre $277.81 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de 11 cents dans les mines (y compris le broyage) ($9.41), de 3 cents dans les manufactures ($7.18) et de 9 cents dans la construction ($10.87). Le nombre moyen d'heures hebdomadaires travaillées a baissé dans les mines (y compris le broyage), s'est élevé dans la construction et n'a pas varié dans les manufactures.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de declarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières periodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

TORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

7-1960

Monthly data were not published but are available on .

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ys, bridges and streets; engineering; construction; highway lge maintenance; transportation; and transportation, commu- and other utilities. Employment, Earnings and Hours, *Cata--002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for s, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. *Catalogue 72-002, February 1968.*

verage Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

otia: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

verage Weekly Earnings, 1968-1970, for Canada, Ontario nto, for scientific and professional equipment; miscellaneous uring industries; non-durable goods; manufacturing; whole-; trade; industrial composite. *Catalogue 72-002, February*

verage Weekly Hours, Average Hourly Earnings, Average ages of Hourly-rated Wage-earners 1961-1967 for:

Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^{O} *72-002 catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moyen gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantiq - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalog décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles p 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Aver Weekly Hours and Average Hourly Earnings, Monthly and Ann Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publi pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalog *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles s publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour 1 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-196*

Toutes les autres données mensuelles et annuelles disponibles pou période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-202* catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Can Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasi rayons, le commerce de détail, le commerce et l'ensemble des indust Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pource ge de femmes, le nombre de salariés, rémunération hebdomadaire moyenn janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien routes et ponts, transports, transports, communication et autres ser publics et l'ensemble des industries. Voir le n^{O} *72-002 au catalo septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures d rées), rémunération hebdomadaire moyenne des employés, ensembl ouvriers, heures hebdomadaires– moyennes et rémunération horaire moy des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Ca et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-00 catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saska wan, la région des Prairies, la Colombie-Britannique et le Canad divisions de l'activité économique impliquées sont: la construction transports, communications et autres services publics et l'ensembl industries. Ces données furent publiées dans l'examplaire de septe 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail po mois de janvier à juin 1978 ont été révisées pour toutes les bra d'activité et toutes les régions géographiques. Les données révisées janvier à avril 1978 inclusivement figurent dans *Emploi, gains et dur travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pou et juin 1978 paraissent dans le numéro de juillet 1978 du bu 72-002.

(1) Les numéros des publications susmentionnées renferment les der données disponibles pour toute série donnée. Les données relat ces séries figurant dans d'autres numéros de ces publications pe avoir été rectifiées depuis.

CONCEPTS AND METHODS

tives

The Monthly Employment, Payrolls and Manhours survey is ed to measure the month-to-month trends of employment, paid and earnings for the commercial sector of the economy with the ion of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- and as weekly averages for earnings and hours paid for. The re compiled and published at detailed industrial and geographic

of Data

The statistics contained in this report are based on information ed through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- r not; it comprises sole proprietorships, partnerships, corpora- nd other forms of organization such as co-operatives. Most onsist of only one "establishment" (see definition under ial Classification) but in some cases the firm is made up of a of establishments which may or may not be engaged in the nd of economic activity.

A firm is considered as "larger" when it employs 20 or more in any one month of the year. Although the intent of the s to cover all such firms, it also includes some firms with less) employees and excludes some firms with more than 20 es; the reason is that, in practice, it is not always possible to promptly enough employment fluctuations in individual

e

The universe for the survey is derived from a central file of rs maintained by the Business Register and Profiling Division tics Canada.

e

All commercial industries are covered by the survey, with the n of agriculture, fishing and trapping; by definition such mercial sectors as education and related services, health and services, religious organizations, private households and ministration and defense are excluded. Because the survey is o "larger firms", the proportion of total employment covered rvey varies among industries, provinces and urban areas. The table shows annual employment as reported in the survey entage of the estimated total number of employees, the latter imated by adding together data from the Employment, and Manhours survey and data from a sample survey of irms plus supplementary surveys. Estimates of the total of employees are published in "Estimates *of Employees by and Industry"* (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie"* numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1978 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1978(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sa survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquê l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enc supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récr commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private house are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y co l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estin de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commer l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not p the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclu l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d économique qui est déterminée en fonction de leur activité princ l'entreprise n'exerce qu'un seul genre d'activité économique, le cla est simple. Les problèmes surgissent lorsqu'elle en exerce plus d exemple lorsqu'elle possède plus d'un établissement. À des fins stat on définit l'établissement, qui consiste habituellement en une us mine, un magasin ou une unité semblable, comme la plus pet constituant un ensemble d'exploitation distinct en mesure de décl les éléments de base de la statistique des activités économiq permettent de calculer la "valeur ajoutée" ou la "majoration brut "bénéfice brut", ainsi que des données sur l'emploi et la rémuné

Pour permettre d'obtenir des statistiques géographiques d l'établissement est souvent subdivisé en unités déclarantes q qu'elles ne puissent fournir toutes les statistiques de base, sont en de déclarer des données sur l'emploi et la rémunération pour des particuliers.

The industrial classification of the statistics contained in this ort is based on the Standard Industrial Classification for 1960. A cription of the various industries and groups of industries is ained in the "Standard Industrial Classification Manual", Cata- e No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 espond to the codes of this manual. These tables also contain the wing groupings which are not part of the "Standard *Industrial sification Manual*".

a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

raphic Classification

Reporting units are assigned to a province, a county (as d by the Census of Population) and, where applicable, to an area. Data for Newfoundland, Prince Edward Island, Nova and New Brunswick are aggregated in some tables to give ics for the Atlantic Region. Similarly, data for Manitoba, tchewan and Alberta are added together to provide totals for the e Region. The 1966 Census of Population's "Metropolitan definitions were used for the nineteen applicable urban areas; efinitions used for other urban areas are based on a labour t concept. The urban areas usually consist of the urban centre as s the surrounding territory. A list showing the territory included h tabulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procur liste indiquant le territoire compris dans chaque région urbaine fi dans les tableaux en vous adressant à la Section des statistiques de l'é et de la rémunération. Les chiffres des unités déclarantes situées ailleu dans une région urbaine indiquée dans les tableaux ou non attribué comté dont le nom figure sur la liste font partie des totaux provi régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept d jours du mois de référence. En pratique, étant donné q d'entreprises tiennent des registres de paye pour cette période p on leur permet de faire porter leur déclaration sur la (les) dern période(s) de paye de chaque mois. Lorsque la période de p laquelle porte la déclaration dépasse une semaine, on raju données en effectuant le calcul suivant: on divise le nombre d d'activité hebdomadaire de l'entreprise par le nombre d ouvrables compris dans la période de paye sur laquelle p déclaration. Si, en raison d'une grève, d'un jour férié ou d facteurs semblables, les données déclarées ne sont pas représen de la période de référence, on procède aux rajustements qui sent afin de traduire fidèlement la situation pendant les sept c jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses a pendant la semaine de référence et pour laquelle l'employeur v contributions au R.P.C. ou au R.R.Q. et à la caisse d'assu chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps pl salariés à temps partiel (ceux qui travaillent régulièrement un d'heures inférieur à la semaine normale de travail de l'entrep les salariés occasionnels (ceux qui sont embauchés de façon te re ou irrégulière et qui ont travaillé au moins sept heures au c la période de référence).

Le concept des salariés exclut les propriétaires et les part d'entreprises non constituées en corporation et ceux qui possè bureau pour l'exercice d'une profession, les travailleurs autono travailleurs familiaux non rémunérés, les bénévoles, les retra travailleurs à domicile, les membres de corps élus ou nom personnel militaire et les personnes fournissant des servic établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une part période de référence mais qui étaient en chômage ou en grève le reste de la période. Les personnes n'ayant pas touché de pa la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant e ment à la production et à des opérations assimi particulier le personnel d'entretien, d'entrepôt et de l le personnel de sécurité, les chauffeurs-livreurs, les v itinérants, les commis des magasins de détail, les ser les contremaîtres remplissant des fonctions analogues des ouvriers dont ils ont la charge, etc. Toutes ces p sont considérées comme des ouvriers, que leurs gain fondés sur des taux de rémunération mensuels, hor autres. Les salaires hebdomadaires moyens sont calcu tous les ouvriers, mais les heures hebdomadaires moy les gains horaires moyens sont calculés uniquement p dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

hodology

The data appearing in this report were collected by means of tionnaires mailed monthly to all firms which employ 20 or more ons in any one month of the year. In order to improve the quality ata, the response rate is increased through two reminders mailed l non-respondents one month and two months after the original out. If the two reminders do not produce a response, the Field ion of Statistics Canada attempts to obtain the required data by hone or in a personal interview. These steps result in a final nse rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of publication. To do this, the unknown figures are replaced by s based on the behaviour of the reporting unit in the previous h and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclara fournies le mois précédent et de celles fournies par les unités déclarant ressemblent à l'entreprise non répondante sur le plan du classemen activité économique, la taille et le lieu géographique, et qui ont rép pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada soigneusement vérifiés à la main et par ordinateur pour assurer sont complets, cohérents et exacts. Pour être vérifiées par ordin. les réponses sont réparties en groupes d'imputation constitu fonction du classement par activité économique, du lieu géograp et de la taille de l'unité déclarante. La composition de ces group telle qu'ils regroupent des unités déclarantes qui présentent les n caractéristiques et dont les caractéristiques affichent les mêmes entre elles. Cette vérification permet de comparer la valeur caractéristique (nombre de salariés, heures de travail, gair salarié, rapport du nombre actuel de salariés à celui du mois dent, etc.) par rapport à la valeur de la caractéristique correspon pour tout le groupe d'imputation. L'écart qui peut séparer la d'une caractéristique et la valeur moyenne de la même caractéri pour le groupe d'imputation tout entier est calculé séparémen chaque groupe et pour chaque caractéristique, et dépend de l'ho néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour t groupe d'imputation, on le remplace par une valeur qui comp variance maximum permise par la vérification par ordinateur. I pas toujours possible de trouver une valeur qui se situe à l'intéri la limite permise par l'ordinateur; si tel est le cas, on remp chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde modification indue d'un chiffre qui était exact au départ. Cela n' trop grave si l'on considère que ce procédé mécanique perr déceler efficacement un grand nombre d'erreurs graves comi points décimaux mal placés, des erreurs d'inscription des don des problèmes attribuables à une mauvaise interprétation des tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de ce unités déclarantes, alors que d'autres renvoient des questionna sont rejetés à la vérification et qui ne peuvent être corrig machine. Une partie ou la totalité des données pour ces unités donc être imputées. Cela signifie que les caractéristiques incorr inconnues sont remplacées par des valeurs calculées en fo d'autres caractéristiques de la même déclaration de l'entrepris déclaration du mois précédent et des caractéristiques du d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations mois. Comme dans le cas de la correction automatique des er est possible qu'une valeur exacte au départ soit remplacée autre. Toutefois, il arrive plus souvent qu'un chiffre erroné existant soit remplacé par un chiffre plus proche de la valeur fondé sur la déclaration de l'entreprise du mois précédent et s d'entreprises qui font partie d'une branche d'activité sen appartiennent au même groupe de taille et sont situées dans l lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-homm une enquête exhaustive, toute inexactitude dans les résultats est att à une erreur d'observation. Parmi les exemples de sources d d'observation, citons l'impossibilité d'obtenir des renseignements c les unités de l'échantillon, les renseignements inexacts fourni

ling and processing of the data. Non-sampling errors are difficult measure and no estimates of this type of error have been obtained this survey as yet. However, non-sampling errors have been kept a minimum by the use of a carefully designed and carefully worded estionnaire, the relative simplicity of the data requested, follow-up non-respondents, thorough editing of data and control of the cessing operations.

tistical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain statistical changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 — December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont ca par des mouvements saisonniers, cycliques et irréguliers. Une désaisonnalisée est une série dont on a éliminé les effets des m ments saisonniers. Les mouvements saisonniers sont ceux qu causés par des événements annuels réguliers comme les change de température, les cycles agricoles, les jours fériés et les vacan convient de noter que la série désaisonnalisée contient des fluctu irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. B of the Census* est utilisée pour désaisonnaliser. Ce système perr déceler les mouvements saisonniers, tendanciels et irréguliers au d'une période de plusieurs années et, à la lumière des mouve passés, d'estimer les coefficients saisonniers appropriés pour l en cours. Sur une base annuelle, toute la série chronologiq données désaisonnalisées est révisée à la lumière des renseigne les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désai lisés de l'emploi, ainsi que les heures hebdomadaires moyenne gains horaires moyens pour certaines séries statistiques. Vous t rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rém tion et heures, séries désaisonnalisées, janvier 1961 — décembr* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer confidentialité des réponses des entreprises soit respectée.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf ind contraire) les colonnes laissées en blanc dans le cas des employés ouvriers indiqués séparément, signifient que les données relativ ouvriers pour lesquels les heures sont enregistrées ne so disponibles.

COMMENTARY

First Estimates(1) – April 1979 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) dex of employment (1961 = 100) for April 1979 showed a 0.1% crease over March. Forestry, manufacturing and finance, insurance nd real estate registered increases, trade remained unchanged and e remaining industry divisions declined. The Atlantic region, uebec and British Columbia recorded gains, while the other two gions declined.

Average weekly earnings rose by 0.7% at the national indus-al composite level in April. Gains were recorded in all industry visions except forestry; the Atlantic region and British Columbia ere the only two regions not participating in this overall gain.

Preliminary Data – March 1979

nployment

Seasonally adjusted, preliminary data for March showed a cline of 0.1% at the Canadian industrial composite index of nployment. A decline was registered in manufacturing, trade re-ined unchanged and the remaining industry divisions increased. sses were registered in Quebec and British Columbia, Ontario nained unchanged and the other two regions increased.

rnings and Hours

Seasonally adjusted, average weekly earnings rose by 1.0% at national industrial composite level. All industry divisions and all ions participated in this advance.

Unadjusted, average weekly earnings increased by 1.0% to 80.76 at the Canadian industrial composite level. Average hourly nings increased by nine cents in mining (including milling) to 49, by six cents in manufacturing to $7.24, and three cents in struction to $10.93. Average weekly hours increased in mining cluding milling), in manufacturing and in construction.

Following are two tables summarizing the variations in all ustry divisions that occurred in the first quarter of 1979 compared he first quarter of 1978.

See note on Statistical Presentation under Concepts and Methods he back of this publication.

Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – avril 1979 (chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada(2) révèlent une progression de 0.1% de mars à avril. Le forestage, les manufactures, et les finances, assurances et immeuble ont enregistré une hausse, alors que le commerce demeurait inchangé et que les autres divisions de l'activité économique subissaient des pertes. La région de l'Atlantique, le Québec et la Colombie-Britannique ont affiché des hausses, alors que les deux autres régions régressaient.

Les gains hebdomadiares' moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.7% en avril. Toutes les divisions de l'activité économique, exception faite du forestage, ont enregistré des gains. Au niveau régional, seules la région de l'Atlantique et la Colombia-Britannique n'ont pas participé à cette hausse générale.

Données provisoires – mars 1979

Emploi

Après désaisonnalisation, les données provisoires pour mars 1979 ont montré un recul de 0.1% au niveau de l'ensemble des industries du Canada. Les manufactures ont fléchi, alors que le commerce est demeuré inchangé et que les autres divisions de l'activité économique ont progressé. Des pertes furent enregistrées au Québec et en Colombie-Britannique, alors que l'Ontario demeurait inchangé et que les deux autres régions affichaient des hausses.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, ont augmenté de 1.0% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique de même que toutes les régions ont participé à cette augmentation.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 1.0% pour atteindre $280.76 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens se sont accrus de neuf cents dans les mines (y compris le broyage) ($9.49), de six cents dans les manufactures ($7.24) et de trois cents dans la construction ($10.93). Le nombre moyen d'heures hebdomadaires a augmenté dans les mines (y compris le broyage), les manufactures et la construction.

Les deux tableaux suivants résument les changements enregistrés dans toutes les divisions de l'activité économique pour le premier trimestre de 1979 comparativement au premier trimestre de 1978.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

Percentage Changes in Index Numbers of Larger Firm Employment from January to March 1979 over January to March 1978 by Industry, for Canada, Regions and Provinces(1)

Taux de variation de l'indice de l'emploi dans les grandes entreprises de janvier à mars 1979 par rapport à janvier à mars 1978, par industrie, pour Canada, régions et provinces(1)

) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

te: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de declarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice etant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le detail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

TABLE 8. Index Numbers (1961=100) of Average Hourly Earnings in Selected Industries, for Canada 1962-1977

TABLEAU 8. Indices (1961=100) de la rémunération horaire moyenne, certaines industries, Canada, 1962-1977

TORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

57-1960

Monthly data were not published but are available on t.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

1-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ays, bridges and streets; engineering; construction; highway idge maintenance; transportation; and transportation, commu-n and other utilities. Employment, Earnings and Hours, *Cata-72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for ays, bridges and streets; engineering; construction; highway lidge maintenance; transportation; and transportation, commu-n and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

a: Transportation; Highway and bridge maintenance.

c Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario ronto, for scientific and professional equipment; miscellaneous cturing industries; non-durable goods; manufacturing; whole-t de; trade; industrial composite. *Catalogue 72-002, February*

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners 1961-1967 for:

: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Voir le n^{O} *72-00 catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saska wan, la région des Prairies, la Colombie-Britannique et le Canad divisions de l'activité économique impliquées sont: la construction transports, communications et autres services publics et l'ensembl industries. Ces données furent publiées dans l'examplaire de septe 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail po mois de janvier à juin 1978 ont été révisées pour toutes les bra d'activité et toutes les régions géographiques. Les données révisées janvier à avril 1978 inclusivement figurent dans *Emploi, gains et dur travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pou et juin 1978 paraissent dans le numéro de juillet 1978 du bu 72-002.

(1) Les numéros des publications susmentionnées renferment les der données disponibles pour toute série donnée. Les données relat ces séries figurant dans d'autres numéros de ces publications pe avoir été rectifiées depuis.

CONCEPTS AND METHODS

ectives

The Monthly Employment, Payrolls and Manhours survey is gned to measure the month-to-month trends of employment, paid s and earnings for the commercial sector of the economy with the ision of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- and as weekly averages for earnings and hours paid for. The are compiled and published at detailed industrial and geographic s.

ce of Data

The statistics contained in this report are based on information ned through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- or not; it comprises sole proprietorships, partnerships, corpora- and other forms of organization such as co-operatives. Most consist of only one "establishment" (see definition under trial Classification) but in some cases the firm is made up of a er of establishments which may or may not be engaged in the kind of economic activity.

A firm is considered as "larger" when it employs 20 or more ns in any one month of the year. Although the intent of the y is to cover all such firms, it also includes some firms with less 20 employees and excludes some firms with more than 20 yees; the reason is that, in practice, it is not always possible to e promptly enough employment fluctuations in individual

rse

The universe for the survey is derived from a central file of yers maintained by the Business Register and Profiling Division istics Canada.

age

All commercial industries are covered by the survey, with the ion of agriculture, fishing and trapping; by definition such mmercial sectors as education and related services, health and e services, religious organizations, private households and administration and defense are excluded. Because the survey is to "larger firms", the proportion of total employment covered survey varies among industries, provinces and urban areas. The ng table shows annual employment as reported in the survey rcentage of the estimated total number of employees, the latter estimated by adding together data from the Employment, s and Manhours survey and data from a sample survey of firms plus supplementary surveys. Estimates of the total r of employees are published in "Estimates *of Employees by e and Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sampl survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête su l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquête supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatif commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private household are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compr l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimatio de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciau l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus da l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'acti économique qui est déterminée en fonction de leur activité principale l'entreprise n'exerce qu'un seul genre d'activité économique, le classem est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, exemple lorsqu'elle possède plus d'un établissement. À des fins statistiq on définit l'établissement, qui consiste habituellement en une usine, mine, un magasin ou une unité semblable, comme la plus petite u constituant un ensemble d'exploitation distinct en mesure de déclarer t les éléments de base de la statistique des activités économiques, permettent de calculer la "valeur ajoutée" ou la "majoration brute" o "bénéfice brut", ainsi que des données sur l'emploi et la rémunération

Pour permettre d'obtenir des statistiques géographiques détaill l'établissement est souvent subdivisé en unités déclarantes qui, b qu'elles ne puissent fournir toutes les statistiques de base, sont en mes de déclarer des données sur l'emploi et la rémunération pour des endr particuliers.

The industrial classification of the statistics contained in this
t is based on the Standard Industrial Classification for 1960. A
iption of the various industries and groups of industries is
ined in the "Standard Industrial Classification Manual", Cata-
No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4
spond to the codes of this manual. These tables also contain the
wing groupings which are not part of the "Standard *Industrial*
ification Manual".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

phic Classification

Reporting units are assigned to a province, a county (as
e by the Census of Population) and, where applicable, to an
rea. Data for Newfoundland, Prince Edward Island, Nova
nd New Brunswick are aggregated in some tables to give
s for the Atlantic Region. Similarly, data for Manitoba,
hewan and Alberta are added together to provide totals for the
Region. The 1966 Census of Population's "Metropolitan
efinitions were used for the nineteen applicable urban areas;
nitions used for other urban areas are based on a labour
oncept. The urban areas usually consist of the urban centre as
he surrounding territory. A list showing the territory included
abulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer liste indiquant le territoire compris dans chaque région urbaine figu dans les tableaux en vous adressant à la Section des statistiques de l'em et de la rémunération. Les chiffres des unités déclarantes situées ailleurs dans une région urbaine indiquée dans les tableaux ou non attribuées comté dont le nom figure sur la liste font partie des totaux provinci régionaux et nationaux.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept der jours du mois de référence. En pratique, étant donné que d'entreprises tiennent des registres de paye pour cette période pré on leur permet de faire porter leur déclaration sur la (les) dernièr période(s) de paye de chaque mois. Lorsque la période de paye laquelle porte la déclaration dépasse une semaine, on rajust données en effectuant le calcul suivant: on divise le nombre de j d'activité hebdomadaire de l'entreprise par le nombre de j ouvrables compris dans la période de paye sur laquelle por déclaration. Si, en raison d'une grève, d'un jour férié ou d'a facteurs semblables, les données déclarées ne sont pas représenta de la période de référence, on procède aux rajustements qui s'in sent afin de traduire fidèlement la situation pendant les sept der jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses abs pendant la semaine de référence et pour laquelle l'employeur vers contributions au R.P.C. ou au R.R.Q. et à la caisse d'assura chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein salariés à temps partiel (ceux qui travaillent régulièrement un no d'heures inférieur à la semaine normale de travail de l'entrepris les salariés occasionnels (ceux qui sont embauchés de façon temp re ou irrégulière et qui ont travaillé au moins sept heures au cou la période de référence).

Le concept des salariés exclut les propriétaires et les parten d'entreprises non constituées en corporation et ceux qui possède bureau pour l'exercice d'une profession, les travailleurs autonome travailleurs familiaux non rémunérés, les bénévoles, les retraité travailleurs à domicile, les membres de corps élus ou nomm personnel militaire et les personnes fournissant des services établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une partie période de référence mais qui étaient en chômage ou en grève per le reste de la période. Les personnes n'ayant pas touché de paye la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, so employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant effe ment à la production et à des opérations assimilées particulier le personnel d'entretien, d'entrepôt et de livra le personnel de sécurité, les chauffeurs-livreurs, les ven itinérants, les commis des magasins de détail, les serveu les contremaîtres remplissant des fonctions analogues à des ouvriers dont ils ont la charge, etc. Toutes ces pers sont considérées comme des ouvriers, que leurs gains s fondés sur des taux de rémunération mensuels, horair autres. Les salaires hebdomadaires moyens sont calculés tous les ouvriers, mais les heures hebdomadaires moyen les gains horaires moyens sont calculés uniquement pour dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of data, the response rate is increased through two reminders mailed to non-respondents one month and two months after the original mailout. If the two reminders do not produce a response, the Field Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of publication. To do this, the unknown figures are replaced by estimates based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclara fournies le mois précédent et de celles fournies par les unités déclarante ressemblent à l'entreprise non répondante sur le plan du classement activité économique, la taille et le lieu géographique, et qui ont rép pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada soigneusement vérifiés à la main et par ordinateur pour assurer q sont complets, cohérents et exacts. Pour être vérifiées par ordina les réponses sont réparties en groupes d'imputation constitué fonction du classement par activité économique, du lieu géograph et de la taille de l'unité déclarante. La composition de ces groupe telle qu'ils regroupent des unités déclarantes qui présentent les mê caractéristiques et dont les caractéristiques affichent les mêmes entre elles. Cette vérification permet de comparer la valeur d caractéristique (nombre de salariés, heures de travail, gains salarié, rapport du nombre actuel de salariés à celui du mois pr dent, etc.) par rapport à la valeur de la caractéristique correspond pour tout le groupe d'imputation. L'écart qui peut séparer la va d'une caractéristique et la valeur moyenne de la même caractéris pour le groupe d'imputation tout entier est calculé séparément chaque groupe et pour chaque caractéristique, et dépend de l'hom néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour to groupe d'imputation, on le remplace par une valeur qui compor variance maximum permise par la vérification par ordinateur. Il pas toujours possible de trouver une valeur qui se situe à l'intérieu la limite permise par l'ordinateur; si tel est le cas, on rempla chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde pa modification indue d'un chiffre qui était exact au départ. Cela n'es trop grave si l'on considère que ce procédé mécanique perme déceler efficacement un grand nombre d'erreurs graves comme points décimaux mal placés, des erreurs d'inscription des donné des problèmes attribuables à une mauvaise interprétation des dé tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de certa unités déclarantes, alors que d'autres renvoient des questionnaire sont rejetés à la vérification et qui ne peuvent être corrigés machine. Une partie ou la totalité des données pour ces unités doi donc être imputées. Cela signifie que les caractéristiques incorrecte inconnues sont remplacées par des valeurs calculées en fonc d'autres caractéristiques de la même déclaration de l'entreprise, déclaration du mois précédent et des caractéristiques du gro d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations cha mois. Comme dans le cas de la correction automatique des erreu est possible qu'une valeur exacte au départ soit remplacée par autre. Toutefois, il arrive plus souvent qu'un chiffre erroné ou existant soit remplacé par un chiffre plus proche de la valeur réel fondé sur la déclaration de l'entreprise du mois précédent et sur c d'entreprises qui font partie d'une branche d'activité sembla appartiennent au même groupe de taille et sont situées dans le m lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes e une enquête exhaustive, toute inexactitude dans les résultats est attribu à une erreur d'observation. Parmi les exemples de sources d'err d'observation, citons l'impossibilité d'obtenir des renseignements de to les unités de l'échantillon, les renseignements inexacts fournis pa

g and processing of the data. Non-sampling errors are difficult asure and no estimates of this type of error have been obtained is survey as yet. However, non-sampling errors have been kept inimum by the use of a carefully designed and carefully worded onnaire, the relative simplicity of the data requested, follow-up n-respondents, thorough editing of data and control of the ssing operations.

tical Presentation

Data Revision

ach month, statistics for three latest months are prepared by the mployment and Payrolls Section. Data for the first, most urrent month, are entitled first estimates. They are based on a mited number of returns (usally about 55%) and only highly ggregated figures are released in the Statistics Canada *Daily* and ne First Estimates table of this publication. Simultaneously, econd estimates are prepared for the month immediately pre-eding the most current data and third estimates for the month rior to that. Both of these latter estimates are of course, of igher quality than that of the first estimates because of the igher rate of returns (approximately 75% and 82% respectively). onsequently, full details for both of these months are shown in is publication.

fter completion of the third estimate, revisions to the data are ade occasionally to incorporate larger corrections originating om late returns and corrected information received from spondents or to rectify mechanical errors. These corrections ppear in the tables of this publication.

dex Numbers

dex numbers are calculated by dividing the current month's nployment (or payroll) by the monthly - average of the total se year employment (or payroll).

he index numbers constitute a better measure of the monthly ends in statistical series than the actual values because they are ot effected by certain statistical changes. For example, a large m erroneously missing from the survey can be introduced by djusting both the current and base year data and, thus, will not istort the monthly changes indicated by the index numbers. owever, the measure of the monthly trend calculated from the tual value will be biased because the additions which should be flected in all months are only included from the time the rrection is made.

erages

ie average weekly hours figure is obtained by dividing total eekly man-hours by the number of wage-earners who worked ose hours. Average hourly earnings are obtained by dividing tal weekly wages of hourly-rated wage-earners by their total eekly hours. Both of these averages apply only to the subset of ge-earners for whom hourly details are reported. It should be ted that total hours include overtime hours actually worked d that the wage-earners total includes part-time wage-earners d casuals working more than seven hours during the survey erence week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. **Révision des données**

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. **Nombres-indices**

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. **Moyennes**

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Employment and Payrolls Section,
Labour Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 992-5613) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des statistiques de l'emploi et de la rémunération,
Division du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf ind contraire) les colonnes laissées en blanc dans le cas des employés ouvriers indiqués séparément, signifient que les données relativ ouvriers pour lesquels les heures sont enregistrées ne sor disponibles.

COMMENTARY

First Estimates(1) – May 1979
(Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) of employment for May showed a 0.1% increase from April. (including milling), construction, trade and service increased he remaining industry divisions decreased. All regions, except antic region, increased.

Average weekly earnings, at the national industrial composite dvanced by 0.8%. All industry divisions except mining (includ-ling) and all regions except Quebec participated in the gain.

Preliminary Data – April 1979

ment

The Canada industrial composite index of employment, sea- adjusted, showed virtually no change from March to April. es in forestry, manufacturing, trade and finance, insurance and ate were offset by losses in the remaining industry divisions. y, at the regional levels, gains in the Atlantic region and Columbia were offset by no change in Quebec and declines in and the Prairie region.

s and Hours

Seasonally adjusted, average weekly earnings rose by 0.6% at onal industrial composite level. All industry divisions except tation, communication and other utilities recorded increases regions with the exception of British Columbia, which d unchanged, advanced.

Unadjusted, for seasonal variation, average weekly earnings 0.6% to $282.78 at the national industrial composite level. hourly earnings increased by ten cents in mining (including to $9.58, by eight cents in manufacturing to $7.32 and by five construction to $10.96. Average weekly hours showed in mining (including milling) and in manufacturing but d in construction.

ote on Statistical Presentation under Concepts and Methods he back of this publication.
dustrial Composite is the sum for all industries with the ption of agriculture, fishing and trapping, education and ted services, health and welfare services, religious organi-ons, private households and public administration and de-e. All statistics are based on returns received from employers ng twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – mai 1979
(chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada(2) révèlent une progression de 0.1% de avril à mai. Les mines (y compris le broyage), la construction, le commerce et le service ont enregistré une hausse, alors que les autres divisions de l'activité économique subissaient des pertes. Toutes les régions ont accusé des gains à l'exception de la région de l'Atlantique.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.8%. Toutes les divisions de l'activité économique à l'exception des mines (y compris le broyage) et toutes les régions à l'exception du Québec ont participé à cette hausse.

Données provisoires – avril 1979

Emploi

Après désaisonnalisation, les données provisoires pour avril 1979 n'ont pratiquement pas varié au niveau de l'ensemble des industries du canada. Les gains dans le forestage, les manufactures, le commerce et les finances, assurances et immeuble furent pratiquement annulés par les pertes dans les autres divisions de l'activité économique. Au niveau régional, les gains dans l'Atlantique et la Colombie-Britannique furent annulés par les baisses dans l'Ontario et la région des Prairies et du Québec qui n'a pas varié.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, ont augmenté de 0.6% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique à l'exception des transports, communications et autres services publics ont enregistré des hausses. Toutes les régions ont progressé à l'exception de la Colombie-Britannique qui est demeurée inchangée.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 0.6% pour atteindre $282.78 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de 10 cents dans les mines (y compris le broyage) ($9.58), de 8 cents dans les manufactures ($7.32) et de 5 cents dans la construction ($10.96). Le nombre moyen d'heures hebdomadaires travaillées a baissé dans les mines (y compris le broyage) et dans les manufactures et s'est élevé dans la construction.

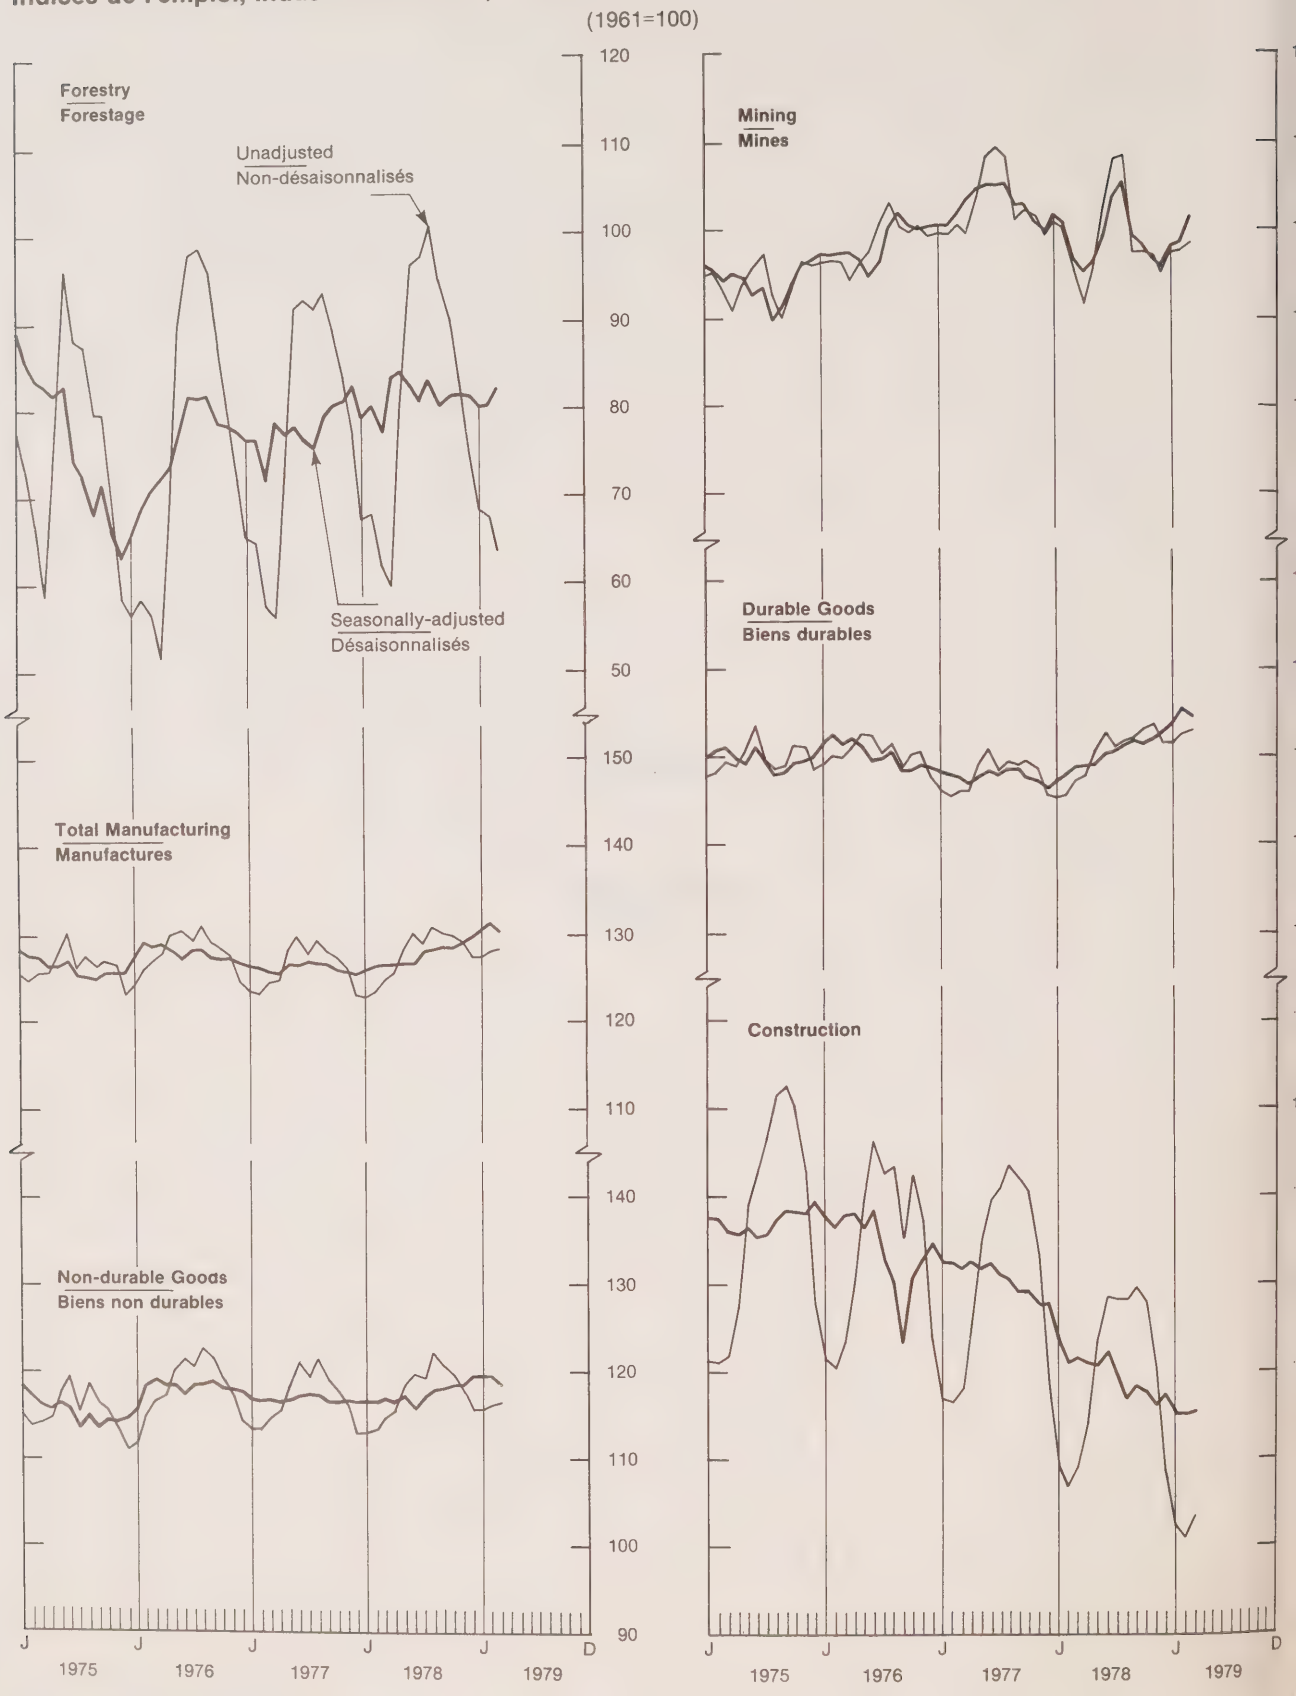

(1) Voir la partie intitulée "Présentation statistique " sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

ISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

. Employment indexes (1961 = 100).

. Average weekly earnings (formerly titled average weekly wages and salaries).

. Average weekly hours and average hourly earnings of hourly-rated wage-earners.

. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

957-1960

Monthly data were not published but are available on iest.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, commu- ion and other utilities. Employment, Earnings and Hours, *Cata- 72-002, October 1971.*

Average Weekly Earnings, 1961-1969 for:

da: Transportation; Highway and bridge maintenance.

ıtic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

ec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario oronto, for scientific and professional equipment; miscellaneous facturing industries; non-durable goods; manufacturing; wholerade; trade; industrial composite. *Catalogue 72-002, February*

Average Weekly Hours, Average Hourly Earnings, Average ly Wages of Hourly-rated Wage-earners 1961-1967 for:

ıla: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^{O} 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n^{O} 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^{O} *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^{O} *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^{O} 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Nombre d'employés, ensemble des ouvriers, ouvriers (heures dé rées), rémunération hebdomadaire moyenne des employés, ensemble ouvriers, heures hebdomadaires– moyennes et rémunération horaire moye des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Can et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-002 catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saskat wan, la région des Prairies, la Colombie-Britannique et le Canada; divisions de l'activité économique impliquées sont: la construction, transports, communications et autres services publics et l'ensemble industries. Ces données furent publiées dans l'examplaire de septem 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail pou mois de janvier à juin 1978 ont été révisées pour toutes les branc d'activité et toutes les régions géographiques. Les données révisées p janvier à avril 1978 inclusivement figurent dans *Emploi, gains et duré travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour et juin 1978 paraissent dans le numéro de juillet 1978 du bull 72-002.

(1) Les numéros des publications susmentionnées renferment les derni données disponibles pour toute série donnée. Les données relativ ces séries figurant dans d'autres numéros de ces publications peu avoir été rectifiées depuis.

CONCEPTS AND METHODS

ctives

The Monthly Employment, Payrolls and Manhours survey is ned to measure the month-to-month trends of employment, paid and earnings for the commercial sector of the economy with the sion of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- and as weekly averages for earnings and hours paid for. The are compiled and published at detailed industrial and geographic

ce of Data

The statistics contained in this report are based on information ned through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- or not; it comprises sole proprietorships, partnerships, corpora- and other forms of organization such as co-operatives. Most consist of only one "establishment" (see definition under trial Classification) but in some cases the firm is made up of a er of establishments which may or may not be engaged in the kind of economic activity.

A firm is considered as "larger" when it employs 20 or more ns in any one month of the year. Although the intent of the y is to cover all such firms, it also includes some firms with less 20 employees and excludes some firms with more than 20 yees; the reason is that, in practice, it is not always possible to ce promptly enough employment fluctuations in individual

rse

The universe for the survey is derived from a central file of yers maintained by the Business Register and Profiling Division tistics Canada.

age

All commercial industries are covered by the survey, with the ion of agriculture, fishing and trapping; by definition such mmercial sectors as education and related services, health and e services, religious organizations, private households and administration and defense are excluded. Because the survey is l to "larger firms", the proportion of total employment covered survey varies among industries, provinces and urban areas. The ing table shows annual employment as reported in the survey rcentage of the estimated total number of employees, the latter estimated by adding together data from the Employment, ls and Manhours survey and data from a sample survey of r firms plus supplementary surveys. Estimates of the total r of employees are published in "Estimates *of Employees by ce and Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a samp survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête s l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêt supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréati commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private household are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compr l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimatio de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dan l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'acti économique qui est déterminée en fonction de leur activité principale l'entreprise n'exerce qu'un seul genre d'activité économique, le classem est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, exemple lorsqu'elle possède plus d'un établissement. À des fins statistiq on définit l'établissement, qui consiste habituellement en une usine, mine, un magasin ou une unité semblable, comme la plus petite u constituant un ensemble d'exploitation distinct en mesure de déclarer t les éléments de base de la statistique des activités économiques, permettent de calculer la "valeur ajoutée" ou la "majoration brute" o "bénéfice brut", ainsi que des données sur l'emploi et la rémunération

Pour permettre d'obtenir des statistiques géographiques détaill l'établissement est souvent subdivisé en unités déclarantes qui, b qu'elles ne puissent fournir toutes les statistiques de base, sont en mes de déclarer des données sur l'emploi et la rémunération pour des endr particuliers.

The industrial classification of the statistics contained in this is based on the Standard Industrial Classification for 1960. A ption of the various industries and groups of industries is ned in the "Standard Industrial Classification Manual", Cata- No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 ond to the codes of this manual. These tables also contain the ing groupings which are not part of the "Standard *Industrial fication Manual*".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

phic Classification

Reporting units are assigned to a province, a county (as by the Census of Population) and, where applicable, to an rea. Data for Newfoundland, Prince Edward Island, Nova and New Brunswick are aggregated in some tables to give s for the Atlantic Region. Similarly, data for Manitoba, ewan and Alberta are added together to provide totals for the Region. The 1966 Census of Population's "Metropolitan lefinitions were used for the nineteen applicable urban areas; nitions used for other urban areas are based on a labour concept. The urban areas usually consist of the urban centre as he surrounding territory. A list showing the territory included tabulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer liste indiquant le territoire compris dans chaque région urbaine figu dans les tableaux en vous adressant à la Section des statistiques de l'em et de la rémunération. Les chiffres des unités déclarantes situées ailleurs dans une région urbaine indiquée dans les tableaux ou non attribuées comté dont le nom figure sur la liste font partie des totaux provinci régionaux et nationaux.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept der jours du mois de référence. En pratique, étant donné que d'entreprises tiennent des registres de paye pour cette période pré on leur permet de faire porter leur déclaration sur la (les) dernièr période(s) de paye de chaque mois. Lorsque la période de paye laquelle porte la déclaration dépasse une semaine, on rajust données en effectuant le calcul suivant: on divise le nombre de j d'activité hebdomadaire de l'entreprise par le nombre de j ouvrables compris dans la période de paye sur laquelle por déclaration. Si, en raison d'une grève, d'un jour férié ou d'a facteurs semblables, les données déclarées ne sont pas représenta de la période de référence, on procède aux rajustements qui s'im sent afin de traduire fidèlement la situation pendant les sept der jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses abse pendant la semaine de référence et pour laquelle l'employeur vers contributions au R.P.C. ou au R.R.Q. et à la caisse d'assura chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein salariés à temps partiel (ceux qui travaillent régulièrement un nor d'heures inférieur à la semaine normale de travail de l'entrepris les salariés occasionnels (ceux qui sont embauchés de façon temp re ou irrégulière et qui ont travaillé au moins sept heures au cou la période de référence).

Le concept des salariés exclut les propriétaires et les parten d'entreprises non constituées en corporation et ceux qui possèdei bureau pour l'exercice d'une profession, les travailleurs autonome travailleurs familiaux non rémunérés, les bénévoles, les retraité travailleurs à domicile, les membres de corps élus ou nommé personnel militaire et les personnes fournissant des services établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une partie période de référence mais qui étaient en chômage ou en grève pen le reste de la période. Les personnes n'ayant pas touché de paye la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, so employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant effec ment à la production et à des opérations assimilées particulier le personnel d'entretien, d'entrepôt et de livra le personnel de sécurité, les chauffeurs-livreurs, les venc itinérants, les commis des magasins de détail, les serveus les contremaîtres remplissant des fonctions analogues à c des ouvriers dont ils ont la charge, etc. Toutes ces perso sont considérées comme des ouvriers, que leurs gains s fondés sur des taux de rémunération mensuels, horaire autres. Les salaires hebdomadaires moyens sont calculés tous les ouvriers, mais les heures hebdomadaires moyenn les gains horaires moyens sont calculés uniquement pour dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of the response rate is increased through two reminders mailed to non-respondents one month and two months after the original mailing. If the two reminders do not produce a response, the Field Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of the publication. To do this, the unknown figures are replaced by values based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclarant fournies le mois précédent et de celles fournies par les unités déclarantes ressemblent à l'entreprise non répondante sur le plan du classement activité économique, la taille et le lieu géographique, et qui ont répon pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada s soigneusement vérifiés à la main et par ordinateur pour assurer qu sont complets, cohérents et exacts. Pour être vérifiées par ordinate les réponses sont réparties en groupes d'imputation constitués fonction du classement par activité économique, du lieu géographic et de la taille de l'unité déclarante. La composition de ces groupes telle qu'ils regroupent des unités déclarantes qui présentent les mêm caractéristiques et dont les caractéristiques affichent les mêmes li entre elles. Cette vérification permet de comparer la valeur d' caractéristique (nombre de salariés, heures de travail, gains salarié, rapport du nombre actuel de salariés à celui du mois pré dent, etc.) par rapport à la valeur de la caractéristique correspond pour tout le groupe d'imputation. L'écart qui peut séparer la val d'une caractéristique et la valeur moyenne de la même caractéristic pour le groupe d'imputation tout entier est calculé séparément p chaque groupe et pour chaque caractéristique, et dépend de l'homo néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout groupe d'imputation, on le remplace par une valeur qui comporte variance maximum permise par la vérification par ordinateur. Il n pas toujours possible de trouver une valeur qui se situe à l'intérieur la limite permise par l'ordinateur; si tel est le cas, on remplace chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde par modification indue d'un chiffre qui était exact au départ. Cela n'est trop grave si l'on considère que ce procédé mécanique permet déceler efficacement un grand nombre d'erreurs graves comme points décimaux mal placés, des erreurs d'inscription des donnée des problèmes attribuables à une mauvaise interprétation des déf tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de certai unités déclarantes, alors que d'autres renvoient des questionnaires sont rejetés à la vérification et qui ne peuvent être corrigés à machine. Une partie ou la totalité des données pour ces unités doiv donc être imputées. Cela signifie que les caractéristiques incorrectes inconnues sont remplacées par des valeurs calculées en fonct d'autres caractéristiques de la même déclaration de l'entreprise, de déclaration du mois précédent et des caractéristiques du grou d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations cha mois. Comme dans le cas de la correction automatique des erreur est possible qu'une valeur exacte au départ soit remplacée par autre. Toutefois, il arrive plus souvent qu'un chiffre erroné ou existant soit remplacé par un chiffre plus proche de la valeur réell fondé sur la déclaration de l'entreprise du mois précédent et sur ce d'entreprises qui font partie d'une branche d'activité semblal appartiennent au même groupe de taille et sont situées dans le mê lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes ét une enquête exhaustive, toute inexactitude dans les résultats est attribua à une erreur d'observation. Parmi les exemples de sources d'erre d'observation, citons l'impossibilité d'obtenir des renseignements de tot les unités de l'échantillon, les renseignements inexacts fournis par

ig and processing of the data. Non-sampling errors are difficult easure and no estimates of this type of error have been obtained his survey as yet. However, non-sampling errors have been kept inimum by the use of a carefully designed and carefully worded ionnaire, the relative simplicity of the data requested, follow-up on-respondents, thorough editing of data and control of the ssing operations.

stical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

ndex Numbers

ndex numbers are calculated by dividing the current month's mployment (or payroll) by the monthly - average of the total ase year employment (or payroll).

The index numbers constitute a better measure of the monthly rends in statistical series than the actual values because they are ot effected by certain statistical changes. For example, a large rm erroneously missing from the survey can be introduced by djusting both the current and base year data and, thus, will not istort the monthly changes indicated by the index numbers. lowever, the measure of the monthly trend calculated from the ctual value will be biased because the additions which should be eflected in all months are only included from the time the orrection is made.

verages

he average weekly hours figure is obtained by dividing total eekly man-hours by the number of wage-earners who worked ose hours. Average hourly earnings are obtained by dividing tal weekly wages of hourly-rated wage-earners by their total eekly hours. Both of these averages apply only to the subset of age-earners for whom hourly details are reported. It should be oted that total hours include overtime hours actually worked id that the wage-earners total includes part-time wage-earners id casuals working more than seven hours during the survey ference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. **Révision des données**

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. **Nombres-indices**

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. **Moyennes**

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Les mouvements saisonniers sont ceux qui sont causés par des événements annuels réguliers comme les changements de température, les cycles agricoles, les jours fériés et les vacances. Il convient de noter que la série désaisonnalisée contient des fluctuations irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet de déceler les mouvements saisonniers, tendanciels et irréguliers au cours d'une période de plusieurs années et, à la lumière des mouvements passés, d'estimer les coefficients saisonniers appropriés pour l'année en cours. Sur une base annuelle, toute la série chronologique des données désaisonnalisées est révisée à la lumière des renseignements les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonnalisés de l'emploi, ainsi que les heures hebdomadaires moyennes et les gains horaires moyens pour certaines séries statistiques. Vous trouverez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunération et heures, séries désaisonnalisées, janvier 1961 – décembre 1971*, numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

Catalogue

Monthly

72-002 **Employment, Earnings and Hours**. Bil.

72-005 **Estimates of Labour Income**. Bil.

72-008 **Estimates of Employees by Province and Industry**. Bil.

Annual

72-206 **Employment, Earnings and Hours Seasonally-adjusted Series**, 1961-1977. Bil.

Occasional

72-506 **Labour Costs in Manufacturing**, 1967. Bil.

72-508 **Estimates of Employees by Province and Industry**, 1961-1968. Bil.

72-510 **Labour Costs in Manufacturing**, 1968. Bil.

72-511 **Labour Costs in Canada**: Mines, Quarries and Oil Wells, 1969. Bil.

72-513 **Estimates of Employees by Province and Industry**, 1961-1972. Bil.

72-514 **Estimates of Employees by Province and Industry**, 1961-1974. Bil.

72-516 **Estimates of Employees by Province and Industry**, 1961-1976. Bil.

Annual/Various

72-601 **Earnings and Hours of Work in Canada**: Retail Trade Industry, September 1970. Bil.

72-602 **Earnings and Hours of Work in Canada**: Accommodation, Food and Recreational Services, 1972. Bil.

72-603 **Earnings and Hours of Work in Canada**: Finance, Insurance and Real Estate, 1973. Bil.

72-610 **Labour Costs in Canada**: Finance, Insurance and Real Estate, 1970. Bil.

72-611 **Labour Costs in Canada**: Transportation, Communication and Other Utilities, 1970. Bil.

72-612 **Labour Costs in Canada**: Manufacturing, 1971. Bil.

72-613 **Labour Costs in Canada**: Mines, Quarries and Oil Wells, 1972. Bil.

72-615 **Labour Costs in Canada**: Trade, 1972. Bil.

72-616 **Labour Costs in Canada**: Education, Libraries and Museums, 1974. Bil.

72-617 **Labour Costs in Canada**: Services to Business Management, 1975. Bil.

72-618 **Labour Costs in Canada**: All Industries, 1976. Bil.

In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Employment and Payrolls Section,
Labour Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 992-5613) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des statistiques de l'emploi et de la rémunération,
Division du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 992-5613) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indicat contraire) les colonnes laissées en blanc dans le cas des employés et ouvriers indiqués séparément, signifient que les données relatives ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First Estimates(1) – June 1979
(Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) dex of employment for June showed a 0.1% increase over May. ains were recorded in mining (including milling), in manufacturing, construction and in trade; service remained unchanged and the maining industry divisions declined. Ontario, the Prairie region and itish Columbia posted gains while the Atlantic region and Quebec clined.

Average weekly earnings, at the national industrial composite vel advanced by 0.4%. Gains were recorded in all industry divisions d in all regions except British Columbia.

Preliminary Data – May 1979

nployment

The Canada industrial composite index of employment, sea- nally adjusted, posted a 0.3% advance from April to May. Gains re recorded in all industry divisions except manufacturing and ance, insurance and real estate which declined. All regions partici- ted in the overall increase.

rnings and Hours

Seasonally adjusted, average weekly earnings increased by % at the national industrial composite level. All industry divisions e except forestry and mining (including milling) and all regions orded gains except Quebec which remained unchanged.

Unadjusted, for seasonal variation, average weekly earnings e by 1.0% to $286.12 as the national industrial composite level. erage hourly earnings increased by eight cents in manufacturing to 40 and by four cents in construction to $10.99 but declined by four ts in mining including milling) to $9.56. Average weekly hours reased in construction, remained unchanged in mining (including ling) and declined in manufacturing.

See note on Statistical Presentation under Concepts and Methods he back of this publication.

Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – juin 1979
(chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada(2) révèlent une hausse de 0.1% de mai à juin. Les mines (y compris le broyage), les manufactures, la construction et le commerce ont enregistré des gains, alors que le service est demeuré inchangé et que les autres divisions de l'activité économique ont subi des pertes. L'Ontario, la région des Prairies et la Colombie-Britannique ont progressé alors que la région de l'Atlantique et le Québec on régressé.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.4%. Toutes les divisions de l'activité économique et toutes les régions (à l'exception de la Colombie-Britannique) ont participé à cette hausse.

Données provisoires(1) – mai 1979

Emploi

Après désaisonnalisation, les donnés provisoires pour mai 1979 ont enregistré une hausse de 0.3% au niveau de l'ensemble des industries du Canada. Exception faite des manufactures et des finances, assurances et immeuble qui ont régressé, toutes les divisions de l'activité économique ont progressé. Toutes les régions ont contribué à cette hausse générale.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, ont augmenté de 1.0% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique ont affiché une hausse à l'exception du forestage et des mines (y compris le broyage). Exception faite du Québec qui est demeuré inchangé, toutes les régions ont accusé des gains.

Les gains hebdomadaires moyens, non désaisonnalisés, ont aussi enregistré un gain de 1.0% pour atteindre $286.12 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de huit cents dans les manufactures ($7.40) et de quatre cents dans la construction ($10.99), mais ont subi une baisse de quatre cents dans les mines (y compris le broyage) ($9.56). Le nombre moyen d'heures hebdomadaires travaillées a enregistré une hausse dans la construction, est demeuré inchangé dans la mines (y compris le broyage) et a diminué dans les manufactures.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

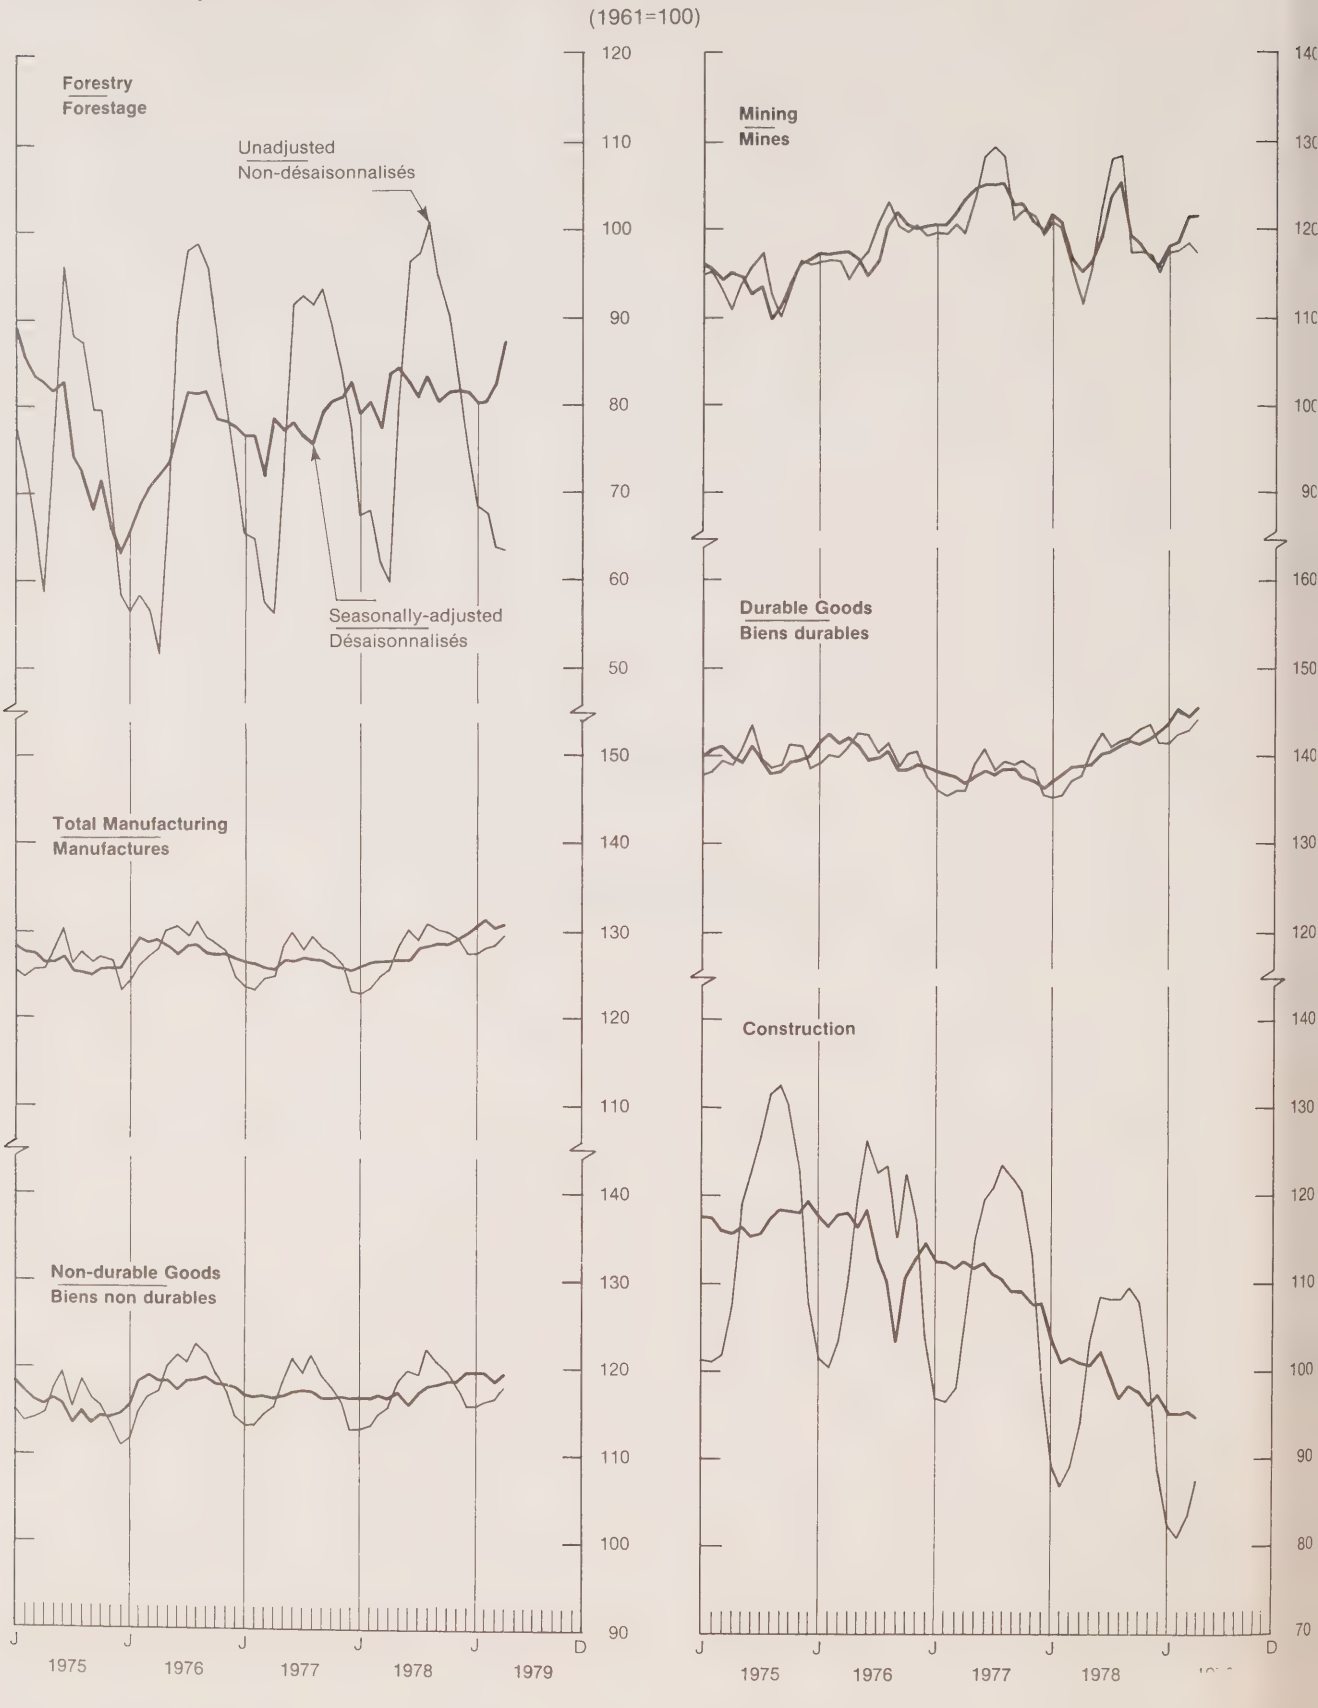

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernieres periodes de paie du mois, tandis que l'indice du prix a la consommation se rapporte au debut du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiee, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépenses. 2. Voir le detail de la statistique de l'indice des prix à la consommation, des methodes de construction de l'indice et de ses elements dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les donnees de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures declarees) seulement. Bien que cette statistique ne figure plus dans les tableaux tires de la presente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est tres repandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la remuneration horaire moyenne pour un secteur particulier d'industrie-region.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960

Monthly data were not published but are available on quest.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ghways, bridges and streets; engineering; construction; highway d bridge maintenance; transportation; and transportation, commu-cation and other utilities. Employment, Earnings and Hours, *Cata-gue 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for ghways, bridges and streets; engineering; construction; highway d bridge maintenance; transportation; and transportation, commu-cation and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

nada: Transportation; Highway and bridge maintenance.

lantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

va Scotia: Transportation, communication and other utilities; Transportation.

iebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario d Toronto, for scientific and professional equipment; miscellaneous nufacturing industries; non-durable goods; manufacturing; whole-e trade; trade; industrial composite. *Catalogue 72-002, February 72.*

Average Weekly Hours, Average Hourly Earnings, Average eekly Wages of Hourly-rated Wage-earners 1961-1967 for:

nada: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^{O} 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n^{O} 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^{O} *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^{O} *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^{O} 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la constructi l'entretien des routes et des ponts. Voir le n^{O} *72-002 catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moyen gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantiq - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalog décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles pc 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Avera Weekly Hours and Average Hourly Earnings, Monthly and Anni Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publié pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalogu *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles so publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour 19 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-1969.*

Toutes les autres données mensuelles et annuelles disponibles pour période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-202* catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canad Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins rayons, le commerce de détail, le commerce et l'ensemble des industrie Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcent ge de femmes, le nombre de salariés, rémunération hebdomadaire moyenne janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien d routes et ponts, transports, transports, communication et autres servic publics et l'ensemble des industries. Voir le n^{O} *72-002 au catalogu septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures décl rées), rémunération hebdomadaire moyenne des employés, ensemble d ouvriers, heures hebdomadaires– moyennes et rémunération horaire moyen des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Canad et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-002 a catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saskatche wan, la région des Prairies, la Colombie-Britannique et le Canada; le divisions de l'activité économique impliquées sont: la construction, le transports, communications et autres services publics et l'ensemble de industries. Ces données furent publiées dans l'examplaire de septembr 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail pour le mois de janvier à juin 1978 ont été révisées pour toutes les branche d'activité et toutes les régions géographiques. Les données révisées pou janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée d travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour ma et juin 1978 paraissent dans le numéro de juillet 1978 du bulleti 72-002.

(1) Les numéros des publications susmentionnées renferment les dernière données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuven avoir été rectifiées depuis.

CONCEPTS AND METHODS

jectives

The Monthly Employment, Payrolls and Manhours survey is igned to measure the month-to-month trends of employment, paid irs and earnings for the commercial sector of the economy with the clusion of agriculture, fishing and trapping.

These measures are expressed in an index form for employnt and as weekly averages for earnings and hours paid for. The a are compiled and published at detailed industrial and geographic els.

urce of Data

The statistics contained in this report are based on information ained through a mail census of "larger firms".

The firm is defined as any business entity whether incorpoed or not; it comprises sole proprietorships, partnerships, corporans and other forms of organization such as co-operatives. Most ns consist of only one "establishment" (see definition under dustrial Classification) but in some cases the firm is made up of a mber of establishments which may or may not be engaged in the ne kind of economic activity.

A firm is considered as "larger" when it employs 20 or more rsons in any one month of the year. Although the intent of the rvey is to cover all such firms, it also includes some firms with less an 20 employees and excludes some firms with more than 20 ployees; the reason is that, in practice, it is not always possible to pture promptly enough employment fluctuations in individual ms.

niverse

The universe for the survey is derived from a central file of nployers maintained by the Business Register and Profiling Division Statistics Canada.

verage

All commercial industries are covered by the survey, with the ception of agriculture, fishing and trapping; by definition such n-commercial sectors as education and related services, health and elfare services, religious organizations, private households and blic administration and defense are excluded. Because the survey is nited to "larger firms", the proportion of total employment covered the survey varies among industries, provinces and urban areas. The llowing table shows annual employment as reported in the survey a percentage of the estimated total number of employees, the latter ing estimated by adding together data from the Employment, ayrolls and Manhours survey and data from a sample survey of naller firms plus supplementary surveys. Estimates of the total mber of employees are published in "Estimates *of Employees by rovince and Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1978 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private households are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activité économique qui est déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. À des fins statistiques on définit l'établissement, qui consiste habituellement en une usine, un mine, un magasin ou une unité semblable, comme la plus petite unité constituant un ensemble d'exploitation distinct en mesure de déclarer tous les éléments de base de la statistique des activités économiques, qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi et la rémunération pour des endroits particuliers.

The industrial classification of the statistics contained in this port is based on the Standard Industrial Classification for 1960. A scription of the various industries and groups of industries is ntained in the "Standard Industrial Classification Manual", Catague No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 rrespond to the codes of this manual. These tables also contain the llowing groupings which are not part of the "Standard *Industrial assification Manual*".

(a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

(b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

(c) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

(d) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

(e) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

(f) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

(g) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

eographic Classification

Reporting units are assigned to a province, a county (as fined by the Census of Population) and, where applicable, to an ban area. Data for Newfoundland, Prince Edward Island, Nova otia and New Brunswick are aggregated in some tables to give atistics for the Atlantic Region. Similarly, data for Manitoba, skatchewan and Alberta are added together to provide totals for the airie Region. The 1966 Census of Population's "Metropolitan ea" definitions were used for the nineteen applicable urban areas; e definitions used for other urban areas are based on a labour arket concept. The urban areas usually consist of the urban centre as ell as the surrounding territory. A list showing the territory included each tabulated urban area is available from the Employment and

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer liste indiquant le territoire compris dans chaque région urbaine figur dans les tableaux en vous adressant à la Section des statistiques de l'emp et de la rémunération. Les chiffres des unités déclarantes situées ailleurs dans une région urbaine indiquée dans les tableaux ou non attribuées à comté dont le nom figure sur la liste font partie des totaux provincia régionaux et nationaux.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept derni jours du mois de référence. En pratique, étant donné que p d'entreprises tiennent des registres de paye pour cette période préc on leur permet de faire porter leur déclaration sur la (les) dernière période(s) de paye de chaque mois. Lorsque la période de paye laquelle porte la déclaration dépasse une semaine, on rajuste données en effectuant le calcul suivant: on divise le nombre de jo d'activité hebdomadaire de l'entreprise par le nombre de jo ouvrables compris dans la période de paye sur laquelle porte déclaration. Si, en raison d'une grève, d'un jour férié ou d'aut facteurs semblables, les données déclarées ne sont pas représentati de la période de référence, on procède aux rajustements qui s'imp sent afin de traduire fidèlement la situation pendant les sept derni jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses absenc pendant la semaine de référence et pour laquelle l'employeur verse d contributions au R.P.C. ou au R.R.Q. et à la caisse d'assuranc chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein, l salariés à temps partiel (ceux qui travaillent régulièrement un nomb d'heures inférieur à la semaine normale de travail de l'entreprise) les salariés occasionnels (ceux qui sont embauchés de façon tempora re ou irrégulière et qui ont travaillé au moins sept heures au cours la période de référence).

Le concept des salariés exclut les propriétaires et les partenair d'entreprises non constituées en corporation et ceux qui possèdent u bureau pour l'exercice d'une profession, les travailleurs autonomes, l travailleurs familiaux non rémunérés, les bénévoles, les retraités, l travailleurs à domicile, les membres de corps élus ou nommés, personnel militaire et les personnes fournissant des services à u établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une partie de l période de référence mais qui étaient en chômage ou en grève pendar le reste de la période. Les personnes n'ayant pas touché de paye pou la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, soit le employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant effective ment à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison le personnel de sécurité, les chauffeurs-livreurs, les vendeur itinérants, les commis des magasins de détail, les serveuses e les contremaîtres remplissant des fonctions analogues à celle des ouvriers dont ils ont la charge, etc. Toutes ces personne sont considérées comme des ouvriers, que leurs gains soien fondés sur des taux de rémunération mensuels, horaires ou autres. Les salaires hebdomadaires moyens sont calculés pou tous les ouvriers, mais les heures hebdomadaires moyennes et les gains horaires moyens sont calculés uniquement pour ceux dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

3. **Earnings**

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

4. **Paid Absence**

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

5. **Standard Work Week**

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of data, the response rate is increased through two reminders mailed to all non-respondents one month and two months after the original mail-out. If the two reminders do not produce a response, the Field Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are still accounted for in the employment, earnings and hours tables of this publication. To do this, the unknown figures are replaced by figures based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclarante fournies le mois précédent et de celles fournies par les unités déclarantes q ressemblent à l'entreprise non répondante sur le plan du classement p activité économique, la taille et le lieu géographique, et qui ont répon pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada so soigneusement vérifiés à la main et par ordinateur pour assurer qu' sont complets, cohérents et exacts. Pour être vérifiées par ordinateu les réponses sont réparties en groupes d'imputation constitués fonction du classement par activité économique, du lieu géographiq et de la taille de l'unité déclarante. La composition de ces groupes e telle qu'ils regroupent des unités déclarantes qui présentent les mêm caractéristiques et dont les caractéristiques affichent les mêmes lie entre elles. Cette vérification permet de comparer la valeur d'u caractéristique (nombre de salariés, heures de travail, gains p salarié, rapport du nombre actuel de salariés à celui du mois préc dent, etc.) par rapport à la valeur de la caractéristique correspondan pour tout le groupe d'imputation. L'écart qui peut séparer la vale d'une caractéristique et la valeur moyenne de la même caractéristiq pour le groupe d'imputation tout entier est calculé séparément po chaque groupe et pour chaque caractéristique, et dépend de l'homog néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout groupe d'imputation, on le remplace par une valeur qui comporte variance maximum permise par la vérification par ordinateur. Il n'e pas toujours possible de trouver une valeur qui se situe à l'intérieur c la limite permise par l'ordinateur; si tel est le cas, on remplace chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde par modification indue d'un chiffre qui était exact au départ. Cela n'est pa trop grave si l'on considère que ce procédé mécanique permet d déceler efficacement un grand nombre d'erreurs graves comme de points décimaux mal placés, des erreurs d'inscription des données des problèmes attribuables à une mauvaise interprétation des défin tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de certaine unités déclarantes, alors que d'autres renvoient des questionnaires qu sont rejetés à la vérification et qui ne peuvent être corrigés à l machine. Une partie ou la totalité des données pour ces unités doiven donc être imputées. Cela signifie que les caractéristiques incorrectes o inconnues sont remplacées par des valeurs calculées en fonctio d'autres caractéristiques de la même déclaration de l'entreprise, de s déclaration du mois précédent et des caractéristiques du group d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations chaqu mois. Comme dans le cas de la correction automatique des erreurs, i est possible qu'une valeur exacte au départ soit remplacée par un autre. Toutefois, il arrive plus souvent qu'un chiffre erroné ou no existant soit remplacé par un chiffre plus proche de la valeur réelle e fondé sur la déclaration de l'entreprise du mois précédent et sur celle d'entreprises qui font partie d'une branche d'activité semblable appartiennent au même groupe de taille et sont situées dans le mêm lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités de l'échantillon, les renseignements inexacts fournis par les

ding and processing of the data. Non-sampling errors are difficult measure and no estimates of this type of error have been obtained this survey as yet. However, non-sampling errors have been kept a minimum by the use of a carefully designed and carefully worded estionnaire, the relative simplicity of the data requested, follow-up non-respondents, thorough editing of data and control of the ocessing operations.

tistical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain statistical changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causée par des mouvements saisonniers, cycliques et irréguliers. Une séri désaisonnalisée est une série dont on a éliminé les effets des mouve ments saisonniers. Les mouvements saisonniers sont ceux qui sor causés par des événements annuels réguliers comme les changement de température, les cycles agricoles, les jours fériés et les vacances. convient de noter que la série désaisonnalisée contient des fluctuation irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet d déceler les mouvements saisonniers, tendanciels et irréguliers au cour d'une période de plusieurs années et, à la lumière des mouvement passés, d'estimer les coefficients saisonniers appropriés pour l'anné en cours. Sur une base annuelle, toute la série chronologique de données désaisonnalisées est révisée à la lumière des renseignement les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonna lisés de l'emploi, ainsi que les heures hebdomadaires moyennes et le gains horaires moyens pour certaines séries statistiques. Vous trouve rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunéra tion et heures, séries désaisonnalisées, janvier 1961 – décembre 1971* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.
